Institut de chimie du Canada | **Pour notre avenir**

### **CONSTRUCT – Art Through Deconstruction**

**When: Friday, December 4, 2015, 5:00–11:00 pm**

**Where: The Pilot Plant in [Colonel By](#) Building, room D-415, University of Ottawa**

Description:

*“This exhibition is an immersive show where art and science will be intertwined seamlessly into a complete experience. This exhibition will include video, performance, sculptures, and painting, etc. Promoting engineers as artists, the goal is to bring art and science together. Selected artworks will demonstrate how creativity can be expressed through creating a space of common ground that ultimately creates an atmosphere that is engaging and all encompassing.*

“It explores the convergence of art and science through deconstruction, reconstruction and the process of creation. The objective of Construct is to create a dialogue between the art and engineering communities by employing sound art, large scale installations, sculpture and projections in a cohesive presentation.

The exhibition highlights the works of Pamela Leszczynski, Kelsea Shore, Sabrina Chamberland, Adrian Göllner, Jeffrey David Morton, Christopher Payne, and Katarina Tkaczyszyn.

Aside from being solely an art show its location will display some of the pilot scale unit operations from chemistry and chemical engineering. Things like fluidized columns, distillation columns, filtration device, and many others. These may be in operation during the show which may be of some interest to our members.
