“Effective Visual Design Workshop”

Graphics, images and figures—visual representations of scientific data and concepts—are critical components of science and engineering research. They communicate in ways that words cannot. They can clarify or strengthen an argument and spur interest into the research process.

This interdisciplinary workshop will address best approaches to creating images/figures for scientific journal submissions and presentations. Graduate students and Post-docs will collaboratively discuss their own works, developing new ideas to represent their research.

1:00-4:00 pm

Tuesday, March 8th, 2016
