

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

MAY 2021

VOLUME 99 NUMBER 5

Issue Highlights 1034

Established Leaders Special Series

Editor's Choice

Process design of a continuous biotransformation with in situ product removal by cloud point extraction 1035
Oliver Fellechner and Irina Smirnova

Regular solution theory applied to asphaltene related phase behaviour 1050
Harvey W. Yarranton and Francisco Ramos-Pallares

Experimental Methods in Chemical Engineering

Experimental methods in chemical engineering: Barrier properties 1068
Martina Roso, Claire Cerclé, Gregory S. Patience and Abdellah Ajji

Articles

Environment, Renewable Resources, Green Processes

Catalytic upgrading of bio-oil: Hydrodeoxygenation study of acetone as molecule model of ketones 1082
Jundong Wang, Michael Jabbour, Lokmane Abdelouahed, Soumaya Mezghich, Lionel Estel, Karine Thomas and Bechara Taouk

Industrial Applications of Chemical Engineering Principles

Investigation of catalytic hydrodeoxygenation of anisole as bio-oil model compound over Ni-Mo/TiO₂ and Ni-V/TiO₂ catalysts: Synthesis, kinetic, and reaction pathways studies 1094
Aqsha Aqsha, Lakshmi Katta, Mansour M. Tijani, Camilla F. de Oliveira and Nader Mahinpey

Esterification of 2-keto-L-gulonic acid and ethanol by pervaporation using NaA zeolite membrane 1107
Lei Zhang, Hao Zhang and Huijian Shang

An experimental study comparing the stability of colloidal dispersion gels with normal polymeric solutions for enhanced-oil-recovery purposes 1116
Reza Rahimi and Amir H. Saedi Dehaghani

New Materials, Nanomaterials and Nanotechnology

Experimental investigation on the microstructure of fluidized nanoparticle agglomerates by TEM image analysis 1125
Shaowei Wang, Huanpeng Liu, Chenyu Yang and Yang Li

Reaction Engineering, Chemical Kinetics, and Catalysis

Kinetic study of carbonylation of ethanol using homogeneous Rh complex catalyst 1137
Lin Xu, Kai Zhang, Muhammad A. Nawaz and Dianhua Liu

Influence of the Ir content and the support on the thiotolerance of the Ir/SiO₂-Al₂O₃ catalysts for selective ring opening of decalin 1146
Silvana A. D'Ippolito, Adriana D. Ballarini, Santiago M. Rosas, Laurence Pirault-Roy, Catherine Especel, Florence Epron and Carlos L. Pieck

Transport Phenomena, Fluid Dynamics and Thermodynamics

Parameter identification of transport PDE/nonlinear ODE cascade model for polymer extrusion with varying die gap 1158
Raffi Toukhtarian, Mostafa Darabi, Savvas Hatzikiriakos, Haile Atsbha and Benoit Boulet

Effect of rheology on mass transfer and bubble sizes in a bubble column operated in the heterogeneous regime 1177
Frédéric Augier and Pedro M. Raimundo

Analysis of premixed and non-premixed co-injection of volatile gas in an industrial indirect pyrolysis plant 1186
Hassan Khodaei, Chris Olson and Petr A. Nikrityuk

Hydrodynamics of bubble coalescence in microchannels 1199
Siddharth Khadiya, Sadhana Kumari and Raghvendra Gupta

Multiobjective optimization of area-to-point heat conduction structure using binary quantum-behaved PSO and Tchebycheff decomposition method 1211
Hongwei Cai, Kai Guo, Hui Liu, Wenyu Xiang and Chunjiang Liu

Effects of gas leakage from the dipleg on the pressure characteristics in a cyclone separator 1228
Di Wang, Liqiang Sun, Chaoyu Yan, Jianguan Wang and Yaodong Wei
