Established Leaders Special Series

Editor’s Choice

Experimental determination of gas diffusivity in liquids—A review
Simant R. Upreti and Anil K. Mehrotra

Estimating uncertainties and parameters for fundamental models used in online monitoring and control
Qiujun A. Liu, Hadiseh Karimi and Kimberley B. McAuley

Experimental Methods in Chemical Engineering

Experimental methods in chemical engineering: High throughput catalyst testing — HTCT
Carlos Ortega, Daria Otyuskaya, Erik-Jan Ras, Luis D. Virla, Gregory S. Patience and Hendrik Dathe

Articles

Biotechnology, Biochemical and Biomedical Engineering

Silica-supported morpholine alkaline ionic liquid catalysts for preparation of biodiesel
Xiang-Rui Zeng, Lu-Lu Wang and Ji-Lin Wang

Environment, Renewable Resources, Green Processes

Diethylenetriamine as a selective pyrrhotite depressant: Properties, application, and mitigation strategies
Erin Farnell, Xinyi Tian and Erin R. Bobicki

Simultaneous NOx and SO2 removal during wet flue gas desulfurization, using copper smelter slag slurry combined with yellow phosphorus
Jiacheng Bao, Helu Xiao, Kai Li, Chi Wang, Xin Song, Xin Sun, Ping Ning and Yansu Luo

Industrial Applications of Chemical Engineering Principles

Elimination of tryptamines from green coffee by supercritical CO2 extraction
Lucia Baldino, Mariarosa Scognamiglio and Ernesto Reverchon

Interfacial and Electrochemical Phenomena

CO2 mobility control by small molecule thickeners during secondary and tertiary enhanced oil recovery
Asghar Gandomkar, Farshid Torabi and Masoud Riazi

Process Control, Systems Engineering and Statistics

Multi-manifold NIRS modelling via stacked contractive auto-encoders
Jin Zhang, Xiaoli Luan and Fei Liu

An accurate numerical method for inversion of Laplace transforms with applications in process dynamics and control
Hooman Fatoorehchi

Reaction Engineering, Chemical Kinetics, and Catalysis

Numerical analysis of the operating characteristics of a large-scale CFB coal-gasification reactor with the QC-EMMS drag model
Yang Liu, Pengju Huo, Xiaohong Li and Haixing Qi

Separation Processes

Salt effects on dynamic bubble nucleation on hydrophobic surfaces in air super-saturated water
Joe Z. Zhou

Transport Phenomena, Fluid Dynamics and Thermodynamics

Experimental study on aeration efficiency in a pilot-scale decelerated oxidation ditch equipped with fine bubble diffusers and impellers
Xiaofei Xu, Wenze Wei, Fengxia Liu, Wei Wei and Zhijun Liu

Numerical investigations into two-phase turbulent modalities for bubble column flows
Xin Tang and Songlin Xu
