THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

DECEMBER 2021 VOLUME 99 NUMBER 12

Issue Highlights ............................................. 2586

Award Announcement

2021 Winner of The Canadian Journal of Chemical Engineering Lectureship Award/
2021 Winner of the Award for Best Graduate Student Paper
Published in The Canadian Journal of Chemical Engineering ................................. 2587

Established Leaders Special Series

Editor’s Choice

Multi-scale modelling of monolith reactors: A 30-year perspective from 1990 to 2020 ................................................................. 2589
Robert E. Hayes and Ivan Cornejo

Articles

Biotechnology, Biochemical and Biomedical Engineering

Exploring the use of high solid loadings in enzymatic hydrolysis to improve biobutanol production from brewers' spent grains ........................................... 2607
Pedro E. Plaza, Mónica Coca, Susana Lucas Yagüe, Marina Fernández-Delgado, Juan C. López-Linares and Maria T. García-Cabero

Environment, Renewable Resources, Green Processes

Pyrolysis of predried dyeing sludge: Weight loss characteristics, surface morphology, functional groups and kinetic analysis ........................................ 2619
Bo Wang, Xiang Xu, Xiu Cao and Yinhe Liu

Industrial Applications of Chemical Engineering Principles

Study on the cracking of carbon anodes used in aluminium industry ........................................... 2635
Salah Amrani, Duygu Kocaefe, Yasar Kocaefe, Dipankar Bhattacharyya, Mohamed Bouazara and Jules Côté

Performance evaluation of free cyanide control strategies in a simulated gold leaching circuit ........................................................................ 2647
Luiz Rogério P. de Andrade Lima and Daniel Hodouin

Interfacial and Electrochemical Phenomena

Formation and stability of oil-laden foam: Effect of surfactant and hydrocarbon solvent ................................................................. 2658
Feng Lin, Jason K. Ng, Yueying Huang, Charley Huang and Hongbo Zeng

Reaction Engineering, Chemical Kinetics, and Catalysis

Stability of kinetic parameters of Co3O4/CeO2 catalyzed methane combustion ................................................................. 2670
Somaye Nasr, Robert E. Hayes and Natalia Semagina

Effect of coal particle size on gasification performance of two-stage entrained-flow coal gasifier ................................................................. 2677
Qiang Fan, Yinhe Liu, Guangyu Li and Defu Che

Effects of CO2/NO/SO2 in flue gas on selenium adsorption on carbonaceous surface ............................................................................... 2691
Ruobing Wang and Chan Zou

Transport Phenomena, Fluid Dynamics and Thermodynamics

Laboratory monitoring approaches for tailings settling and evaluation of flocculant and coagulant treatments ............................................................. 2702
Petro Babak, Feng Li, Sandra Motta Cabrera and Apostolos Kantzas

Measuring the permeabilities of binary gas mixtures with a novel time-lag technique ........................................................................ 2713
Zhao He, Kheng Lim Goh, Xianshe Feng and Kean Wang

Effects of working conditions on the performance of an ammonia ejector used in an ocean thermal energy conversion system ................................................................. 2723
Shizhen Li, Xiaoya Zhai, Yanjun Liu, Weimin Liu, Lei Wang and Jingchi Zhang

Numerical analysis of hydrodynamic characteristics and interphase coupling in a gas-solid cyclone reactor ................................................................. 2737
Anjun Li, Zhenbo Wang, Liyun Zhu, Ziyi Wang, Xiaogang Xu and Liang Feng

Experimental study on the flow field characteristics of the two-layer impinging stream mixer ........................................................................ 2748
Jianwei Zhang, Changwei Ding, Xin Dong, Ying Feng and Fanrong Ma

A simple numerical method to simulate the flow through filter media: Investigation of different fibre allocation algorithms ................................................................. 2760
Liliana de Luca Xavier Augusto, Paolo Tornoville, José A. S. Gonçalves and Gabriela C. Lopes

A bubble structure dependent drag model for CFD simulation of bi-disperse gas-solid flow in bubbling fluidizations ................................................................. 2771
Shaohua Du and Lijun Liu

An efficient numerical model for nonisothermal fluid flow through porous media ........................................................................ 2789
Yaghoub Dastkhan and Alireza Kazemi
