

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

MAY 2022

VOLUME 100 NUMBER 5

Issue Highlights 850

Articles

Environment, Renewable Resources, Green Processes

Effect of phosphorylation on the planar compaction of reinforcements made of unidirectional flax fibres supported by a thin flax fibre mat 851
Rodrigue Stéphane Mbakop, François Brouillette and Gilbert Lebrun

Vapour–liquid–liquid and vapour–liquid equilibrium of paraffinic aromatic synthetic naphtha/water blends: Prediction of the number of phases 866
Sandra Lopez-Zamora, Jeonghoon Kong, Salvador Escobedo and Hugo de Lasa

The influence of sulphate on the treatment of azo dye-containing wastewater in an anaerobic-microaerobic compartmentalized fixed-bed bioreactor 885
Marcelo G. P. Carvalho, Denise M. S. Marcelino, Osmar Menezes, Eugenio Foresti, Marcia H. Z. Damianovic, Mario T. Kato, Lourdinha Florêncio and Savia Gavazza

Use of immobilized zinc oxide photocatalysts for wastewater treatment: Application to methylene blue degradation 893
Michalis V. Karavasilis and Christos D. Tsakiroglou

Heat recovery from hydrothermal carbonization slurry product by coupling processes of flash and organic Rankine cycle: Thermodynamic analysis 911
Jiandong Jia, Hongwei Chen, Ruikun Wang, Zhenghui Zhao, Daomeng Ren, Hantao Liu and Haoyang Lei

Industrial Applications of Chemical Engineering Principles

Inhibition of calcium sulphate hemihydrate crystallization under simulated conditions of phosphoric acid evaporation 923
Juan G. Tanquero, El-Sayed A. Abdel-Aal, Raymond S. Farinato, Hassan El-Shall and Brij M. Moudgil

Synthesis of stream-split heat exchanger networks using non-structural model considering serial equipment in stream branches and submixing of substreams 933
Heri Ambonisy Kayange, Guoming Cui, Yue Xu and Yuan Xiao

Experimental and numerical evaluation of the performances of type-C and three-segment demisters used in cooling towers 949
Ya Tang, Yu Ting Xu, Chang He, Bing Jian Zhang and Qing Lin Chen

Effect of ash composition on adsorption and agglomeration characteristics in low-low-temperature electrostatic precipitator systems 966
Jiahao Jiang, Gaofeng Fan, Lei Deng and Defu Che

New Materials, Nanomaterials and Nanotechnology

Exploring anchoring performance of defective MgO nanotubes for lithium–sulphur batteries: A density functional theory (DFT) study . . . 979
Tianjiao Zhu, Xiaoqian Hao, Qiao Wu and Wenju Wang

Editor's Choice

Microfluidic synthesis of platinum nanoparticles supported on reduced graphene oxide, titanium dioxide, and carbon for PEM fuel cells 990
Prashant L. Suryawanshi, Sarang P. Gumfekar and Shirish H. Sonawane

Calcium alginate-regenerated spent bleaching earth composite beads for efficient removal of methylene blue 1001
Dihia Aberkane, Chafika Meziti, Soraya Ihaddaden, Abdelhamid Boukerroui and Benoît Cagnon

Process Control, Systems Engineering and Statistics

A novel key performance indicator oriented process monitoring method based on multiple information extraction and support vector data description 1013
Xueyi Zhang, Liang Ma and Kaixiang Peng

Reaction Engineering, Chemical Kinetics, and Catalysis

Liquid and solids phase backmixing in a bubble and slurry bubble column using a virtual tracer response methodology based on the trajectory data of the radioactive particle tracking (RPT) technique 1026
Lu Han, Premkumar Kamalanathan and Muthanna H. Al-Dahhan

Bifunctional catalyst of mordenite- and alumina-supported platinum for isobutane hydroisomerization to *n*-butane 1038
Yaoyao Duan, Hui Jiang and Hefang Wang

Transport Phenomena, Fluid Dynamics and Thermodynamics

The impact of isothermal flow assumption on accuracy of pressure transient analysis results 1050
Yaghoub Dastkhan and Alireza Kazemi

Investigation of local and temporal interfacial shear stress distribution during membrane emulsification 1061
Tobias Wollborn, Patrick Giefer, Helena Kieserling, Anja M. Wagemans, Stephan Drusch and Udo Fritsching

Experimental study of mixing performance with the tridimensional rotational flow sieve tray under low Reynolds number 1079
Kun Yang, Meng Tang, Dewu Wang, Yan Liu, Hongkai Wang, Yurong Zhang, Shaofeng Zhang and Lu Nie

Effect of thermal boundary conditions on heat transfer performance of liquid–liquid Taylor flow through a microchannel with obstruction . . 1091
Chandrasekhar Sankepally, Akash Patel and Raju R. K. Vysyaraju
