

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

FEBRUARY 2023

VOLUME 101 NUMBER 2

Issue Highlights	531
Announcements	
2022 winner of <i>The Canadian Journal of Chemical Engineering</i> Lectureship Award	532
Systems and Control Division Special Series	
Editor's Choice	
Bypass control of heat exchanger network under uncertainty	533
<i>Chaitanya Manchikatta, Zukui Li and Biao Huang</i>	
Experimental Methods in Chemical Engineering	
Experimental methods in chemical engineering: Computational fluid dynamics/finite volume method—CFD/FVM	545
<i>Laurens Van Hoecke, Dieter Boeye, Arturo Gonzalez-Quiroga, Gregory S. Patience and Patrice Perreault</i>	
Special Issue Section Honouring Professor P. Raj Bishnoi	
Preface to the special issue section honouring Professor P. Raj Bishnoi	562
<i>Peter Englezos and Anil K. Mehrotra</i>	
A review of the contributions of P. Raj Bishnoi to chemical engineering	565
<i>Anil K. Mehrotra and Peter Englezos</i>	
Historical perspectives on gas hydrates and citation impact analysis	583
<i>Praveen Linga</i>	
Extension of the electrolyte Trebble–Bishnoi EOS to mixed-salt systems, and application to vapour liquid and solid (hydrate) vapour liquid equilibrium calculations	606
<i>Matthew A. Clarke</i>	
A unified interaction model for multiphase flows with the lattice Boltzmann method	623
<i>Ramon G. C. Lourenço, Pedro H. Constantino and Frederico W. Tavares</i>	
Piezo-elasticity and stability limits of monocrystal methane gas hydrates: Atomistic-continuum characterization	639
<i>Xiaodan Zhu, Alejandro D. Rey and Phillip Servio</i>	
Phase equilibria of hydrates from ternary mixtures of methane + ethane + propane and methane + propane + carbon dioxide	651
<i>Sebastian Ovalle, Camilo Martinez and Juan G. Beltran</i>	
Experimental study of CO ₂ hydrate formation in porous media with different particle sizes	657
<i>Yu Zhang, Jing Cai, Xiao-Sen Li, Zhao-Yang Chen and Gang Li</i>	
Effect of electrolyte solubility and column inclination on the performance of monoethylene glycol regeneration process	671
<i>Hyunho Kim, Jong Yeon Jung, Ki-Heum Park and Yutaek Seo</i>	
Current challenges in hydrate-based desalination: Kinetic and thermodynamic perspective	681
<i>Muhammad Naveed Khan, Hongfei Xu, Cornelis J. Peters and Carolyn Ann Koh</i>	
Kinetic investigation of CO ₂ and N ₂ clathrate hydrate formation using cyclopentane: Application in desalination	696
<i>Lagnajita Paul, Namrata Gaikwad and Rajnish Kumar</i>	
Thermodynamic and kinetic study of fluorinated gas hydrates for water purification	708
<i>Hai Son Truong-Lam, Changsu Jeon and Ju Dong Lee</i>	
Equilibrium properties and crystal growth of D ₂ O + cyclopentane hydrate for sustainable tritium separation	718
<i>Meku Maruyama and Ryo Ohmura</i>	
Phase equilibria of methane/TBAC mixed hydrates in the presence of produced water	726
<i>Chandradeep Bollineni and Nagu Daraboina</i>	
Analysis of short- and long-term system response during gas production from a gas hydrate deposit at the UBGH2-6 site of the Ulleung Basin in the Korean East Sea	735
<i>George J. Moridis, Jihoon Kim, Matthew T. Reagan and Se-Joon Kim</i>	
Adsorption-hydration hybrid process for CO ₂ capture in a fixed bed of activated carbons	764
<i>Wen-Xin Dai, Xi-Yue Li, Dong-Liang Zhong, Jin Yan, Kai Dong and Xiao-Yan Deng</i>	
Laboratory testing of dispersant effectiveness at high pressures	772
<i>Eleftheria Antoniou and Nicolas Kalogerakis</i>	

Articles

Environment, Renewable Resources, Green Processes

- Impact of post-pyrolysis wash on biochar properties 782
Anthony Fazzalari, Mamdouh Abou-Zaid, Cedric Briens and Lauren Briens
- Release of nitrogen during thermochemical conversion of Shenhua bituminous coal under Ar, CO₂, and air atmospheres 797
Jinzhong Zhang, Zhiqi Wang, Ruidong Zhao, Tianju Chen and Jinhu Wu
- Oxygen uncoupling behaviour for ilmenite ore oxygen carrier generated from a calcination treatment mixed with natural manganese ore 805
Xue Liu, Lin Li, Zhihao Zhou, Zhenkun Sun and Lunbo Duan

Industrial Applications of Chemical Engineering Principles

- Solubility of sodium oxalate in kraft black liquors below 100°C 819
Ahmed Naser Khafhafera, Jo-Wen Jasmine Kung and Nikolai DeMartini
- Single and two-phase flows in a horizontal pipe with a Kenics static mixer: Effect of pressure drop on mixing 828
Massinissa Hosni, M'hamed Hammoudi, El-Khider Si-Ahmed, Jack Legrand and Lamine Douib
- Fluidization-based chemical vapour deposition for alumina coating on tubular carbon steel substrates—Modelling and validation. 845
Prasad A. Dabhade, Debapriya Mandal, Sanjay R. Satre and Bahubali K. Chougule
- Direct preparation of battery-grade lithium carbonate via a nucleation–crystallization isolating process intensified by a micro-liquid film reactor 870
Jianghao Tan, Qi Wang, Yanjun Lin and Xu Xiang
- Quantification of powder holdups in the presence of a cavity with lateral gas–powder injection in a packed bed 883
Shrutee Lakshminarasimha, Abhinav Maurya, Govind Sharan Gupta and Gadi Venkat Arun Chaitanya

New Materials, Nanomaterials and Nanotechnology

- Selective removal of Cr (VI) from hydrometallurgical effluent using modified cellulose nanocrystals (CNCs) with succinic anhydride and ethylenediaminetetraacetic acid: Isotherm, kinetics, and thermodynamic studies 896
Musamba Banza and Hilary Rutto

Process Control, Systems Engineering and Statistics

- Multivariate temporal process monitoring with graph-based predictable feature analysis 909
Wei Fan, Qinjin Zhu, Shaojun Ren, Bo Xu and Fengqi Si
- Supervised sparse preserving projections model based on distributed principal component analysis for chemical process monitoring 925
Guangwei Ding and Xingsheng Gu

- Continuous monitoring of EDTA extractable iron from mineral slurries using a microfluidic chip 944
Daisy Yang, Aliaa I. Shallan, Michael C. Breadmore, Christopher Greet and Craig Priest

- Robustness analysis of chemical process systems based on complex network non-linear load capacity model 953
Ran Dong, Zheng Wang, Ruijie Liu, Huapeng Li, Xiaoping Jia and Fang Wang

- Quality-relevant and process-relevant fault monitoring based on GNPFR and the fault quantification index for industrial processes. 967
Miao Mou and Xiaoqiang Zhao

Separation Processes

- DEM simulations of spherical particle–particle collisions 984
Wenming Liu, Wei Jiang, Honghong Zhang, Xuedong Liu, Hongmei Liu, Weiwen Zheng and Wei Zhao

- Use of the Weibull model on sizing thickeners—Part II: Methods of thickener sizing 996
Daniel José de Oliveira Ferreira, Roberto Galery, Marcelo Cardoso and Idalmo Montenegro de Oliveira

- Study on molecular structure and association behaviour of heavy subfractions of vacuum residue by an improved separation method. 1011
Feng Tian, Wei Han, Yonghong Zhu, Yijie Wang, Xiaoyong Fan, Chongpeng Du, Feili Wang, Huaan Zheng, Haipeng Teng and Dong Li

- Efficient recovery of phenol from phenolic wastewater by emulsion liquid membrane 1027
Yabing Qi and Sijing Zhang

- Recent advances in the approaches to recover rare earths and precious metals from E-waste: A mini-review 1043
Purva Paranjape and Manishkumar D. Yadav

Transport Phenomena, Fluid Dynamics and Thermodynamics

- Investigation of mixing performance in a semi-active T-micromixer actuated by magnetic nanoparticles: Characterization via Villermaux–Dushman reaction 1055
Neda Azimi, Masoud Rahimi, Fardin Hosseini and Omid Jafari

- Modelling textural and mass transfer properties for gamma-alumina catalysts using randomly generated pore networks 1068
Sónia Ferreira, Jan J. Verstraete, Elsa Jolimaitre, Damien Leinekugel-le-Cocq and Christian Jallut

- Improved thermal–hydraulic performance of a microchannel with hierarchical honeycomb porous ribs 1083
Man Wang, Wenqiang Zhang, Gongming Xin, Fei Li, Jin Huan Pu and Mu Du

- Experimental study of secondary and tertiary modes combined low salinity water and polymer flooding in sandstone porous media 1095
Farzad Mokhtari, Siavash Riahi and Behzad Rostami
