

2024 CSC AGM Election Voting

Why are we conducting online voting for the Board of Directors before the AGM?

For CSC 2024 we have decided to conduct online voting for the Board of Directors in advance of the Annual General Meeting (AGM). Here's why:

- 1. Providing enhanced accessibility:** Online voting ensures that everyone has the opportunity to participate, even if they cannot attend the AGM in person. This inclusivity is important as it allows more conference delegates to have their voices heard in the election process.
- 2. Minimizing time constraints:** The AGM has a strict 40-minute time frame to cover the full agenda. With several Director positions up for election and some having multiple candidates, conducting the vote during the AGM would be impractical and time-consuming.
- 3. Making a timely announcement:** To comply with our governance requirements, the new Board of Directors needs to be decided and announced by the end of the AGM. Online voting allows us to complete the voting process efficiently and ensures that we can make the necessary announcements during the meeting.

We believe that online voting is the best solution to ensure a fair and efficient election process.
Thank you for your understanding and cooperation.
