Process Safety Management Award

This award is presented to an individual who has made outstanding contributions in Canada to process safety and loss management.

Deadline

December 1 every year

Sponsor

Process Safety Management (PSM) Subject Division

Award

- A framed certificate
- \$1,500 cash

Nomination Requirements

A nomination package must be submitted electronically through [Awards Force](#). The package should include the following:

- **Citation** (maximum 250 words) statement explaining why the nominee should receive the award. This is the key document of the nomination and should provide information about the nominee's achievements pertinent to the award.
- **Curriculum Vitae** (maximum nine pages).
- **Supporting Letters** (3 to 5). At least two letters must be from outside the nominee's organization. Suggested information to include in a supporting letter:
 - your relationship to the nominee, how long you have known that individual and your connection with them
 - outline the achievements of the nominee: what did they accomplish, when, where and the outcome
 - speak to the character of the nominee: leadership qualities, outreach to the community, etc.
 - other personal information you deem important for this award

Notes

The award shall be presented at the Canadian Chemical Engineering Conference.

The award winner will be required to register and present an award lecture in the conference.

Membership in the Society is not a prerequisite for this award.

Nominations that are not awarded will remain active for three years in total, commencing from the initial nomination date. For the nomination to be considered during the active duration, the nominators are responsible for resubmitting through Awards Force annually and keeping the record of their nominees up to date.

Selection Committee

- CSChE Director of Awards as non-voting Chair
- CSChE Past President
- Chair of the PSM Division
- Immediate Past Chair of the PSM Division
- Most recent PSM Award winner

Notes

In selecting the award winner, the committee will consider primarily the direct influence of the nominee's Process Safety and Loss Management (PSLM) work for the prevention of major industrial accidents in Canada. Meritorious performance of an administrative or indirect nature shall receive secondary consideration.

The award shall be presented annually unless the committee considers that no suitable candidate is nominated.

When considering a nominee who has applied for multiple awards (or is already an award winner), the committee will evaluate the nominee based on their accomplishments that are different from those being considered (or already recognized in the last five years) by other award committees.
