

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

NOVEMBER 2023

VOLUME 101 NUMBER 11

Issue Highlights	6047	Convective heat transfer coefficient for the side-wall in a fixed bed	6151
Announcements		<i>Chinmay Baliga and Petr Nikrityuk</i>	
2023 Lectureship Award Winner	6048	Numerical modelling of rotating packed beds used for CO ₂ capture processes: A review	6170
<i>Sohrab Zendejboudi</i>		<i>Munendra Pal Singh, Ahmed Mongy Alatyar, Abdallah Sofiane Berrouk and Muhammad Saeed</i>	
Conversations in Chemical Engineering Special Series		Application of artificial neural network for prediction of 10 crude oil properties	6203
Editor's Choice		<i>Shahla Alizadeh, Souvik Ta, Lakshminarayanan Samavedham and Ajay K. Ray</i>	
It's time for an update—A perspective on fuel cell electrodes	6050	Novel design of flow path spacers for reverse electro dialysis cell	6215
<i>Andre Pin Chun Lee and ChungHyuk Lee</i>		<i>Suddhasatwa Basu and Criti Mahajan</i>	
Experimental Methods in Chemical Engineering Special Series		Multi-agent reinforcement learning for process control: Exploring the intersection between fields of reinforcement learning, control theory, and game theory	6227
Experimental methods in chemical engineering: Data processing and data usage in decision-making	6055	<i>Yue Yifei and Samavedham Lakshminarayanan</i>	
<i>Émilie Thibault, Moncef Chioua, Maxime McKay, Milan Korbel, Gregory S. Patience and Paul R. Stuart</i>		Integrating mechanical mixing, headspace, and rheology in a computational model for a fermentation process	6240
Process Safety Special Series		<i>M. Constanza Sadino-Riquelme, José Rivas, David Jeison, Andrés Donoso-Bravo and Robert E. Hayes</i>	
Computational modelling of explosions caused by failed Li-ion batteries	6079	A parallel algorithm for direct simulation of fluidized beds	6261
<i>Nicolás Santiago Navarro Simancas, Juliana Puello Méndez and Sávio Souza Venâncio Vianna</i>		<i>Johnwill Keating and Peter D. Minev</i>	
Special Issue Section Honouring Dr. Krishnaswamy Nandakumar		Computational fluid dynamics simulation of reactive absorption of CO ₂ in a structured packed column	6271
Festschrift issue section of <i>The Canadian Journal of Chemical Engineering</i> in honour of Dr. Krishnaswamy Nandakumar	6091	<i>Sreemusali Venkata Anjani Kiran and Panneerselvam Ranganathan</i>	
<i>Jacob Masliyah</i>		Articles	
Introduction to the K. Nandakumar Festschrift Issue section of <i>CJCE</i>	6094	Environment, Renewable Resources, Green Processes	
<i>Mranal Jain and Lakshminarayanan Samavedham</i>		Antioxidative degradation mechanism of 2-mercaptobenzimidazole modified TEPA-MCM-41 adsorbents for carbon capture from flue gas	6284
Double-sensor conductivity probe applied in a flotation system	6100	<i>Ruotong Wang, Tuo Guo, Xiaoju Xiang, Yinmei Yin, Qingjie Guo and Yanxia Wang</i>	
<i>Pedro Silva Aires, Artin Afacan, Qi Liu and Vinay Prasad</i>		Preparation of biogum thickener and properties of recoverable fracturing fluid based on environmental protection	6296
Control valve stiction detection using Markov transition field and deep convolutional neural network	6114	<i>Chengyu Zhou, Linghao Zeng, Jing Zhao, Qixiang Mei, Min Zhou, Ying Xiao, Qian Zhang, Yuzhu Fan and Peng Zhang</i>	
<i>Amirreza Memarian, Seshu Kumar Damarla and Biao Huang</i>		Regeneration of [Fe(II)-NTA] ⁻ catalyzed by activated carbon in the simultaneous removal of sulphur dioxide and nitric oxide	6305
Using polymer adsorption data and a population balance model to estimate how polymer dosage affects the flocculation of oil sands tailings	6126	<i>Xiang-Li Long, Li Gong and Cong Li</i>	
<i>Daniel V. Dixon and João B. P. Soares</i>		Ozonation/extraction coupled non-catalytic desulphurization of VGO/natural gas condensate	6315
Investigation of solid particle erosion-related failures in once-through steam generators (OTSGs) in oil sands in-situ production: The limitations of the API RP 14E guideline in OTSG design or operational decision-making	6135	<i>Mohsen Adhami, Movahedirad Salman, Mohammad Amin Sobati and Amir Hossein Khalili-Garakani</i>	
<i>Oluwaseun Ezekiel Adedeji, Anupam Kumar, Basil Perdicakis and R. Sean Sanders</i>			

A silver-based coordination polymer with phenylacetylene ligands for efficient visible light photocatalysis 6328
Pan Zhu, Yujing Ma, Jun Li, Yang Jin, Haitao Cai, Chun Xu, Minggang Huang and Ming Chen

Industrial Applications of Chemical Engineering Principles

Efficient photocatalytic removal of N-nitrosamines from amine washing wastewater using bismuth tungstate 6337
Vasu Maddineni, Feysal M. Ali and Hussameldin Ibrahim

Simulation analysis of gas–solid flow characteristics and water evaporation in flue gas semi-dry desulphurization process based on CPFD method 6352
Peng Liu, Xuan Wu, Haiguang Li, Yuxuan Bo and Nan Wei

Synthesis and characterization of synthetic lubricants based on dibasic acid 6372
Reham I. El-Shazly, Mohamed E. Haseeb, Amal M. Nassar and Nehal S. Ahmed

Effect of engineered water and scale inhibitor concentration on the adsorption performance of gypsum inhibitors on multi-walled carbon nanotubes and crushed sandstone 6385
Ali Hosseini, Sina Talebi and Siavash Riahi

Flow rate impact on the performance of immobilized nanoFeCu for sewage treatment and its reusability 6404
Mieow Kee Chan, Kah Weng Lim, Alijah Mohd Aris, Yoke Ping Ho and Bee Chin Khor

Interfacial and Electrochemical Phenomena

A review of the advancements in the synthesis and modification of mesoporous carbon and its application to electrochemistry . . . 6417
Jiexia Lei, Xiaojun Hu, Yihong Tang, Hongbo Zhang and Kan Li

New Materials, Nanomaterials, and Nanotechnology Engineering

On modelling of surface tension of CMC- α -Fe₂O₃ nanoparticles by fuzzy-hybrid approach: A comparison study 6446
Hale Goncse Kocken, Mert Akin Insel, Gizem Temelcan, Selcan Karakuş and Inci Albayrak

Process Control, Systems Engineering, and Statistics

Hierarchical-linked batch-to-batch optimization based on transfer learning of synthesis process 6455
Fei Chu, Haoran Wang, Jiachen Wang, Runda Jia, Dakuo He and Fuli Wang

A novel density ratio-based batch active learning fault diagnosis method integrated with adaptive Laplacian graph trimming. 6471
Xue Jiang, Yuan Xu, Qun-Xiong Zhu, Yang Zhang, Yan-Lin He, Ming-Qing Zhang and Wei Ke

Reaction Engineering, Chemical Kinetics, and Catalysis

Direct and transfer hydrogenation of furfural over MOF-derived Pd-Cu@C catalysts 6482
Xinxin Xia, Yuxin Gao, Pei Li, Mengyao Fu, Lingyi Zhu, Cuiqin Li and Feng Li

Analysis of interaction effects of persulphate and peroxymonosulphate on solar photocatalytic degradation of cortisone acetate 6494
Mansoor Feilizadeh, Khosrow Jafarpur, Seyed Mostafa Nowee and M. R. Karimi Estahbanati

Experimental and numerical investigation of the reaction of 2,4-thiazolidinedione and *p*-methoxybenzaldehyde in microreactors for the production of drugs for diabetes mellitus type 2 treatment. . . . 6505
Rodrigo de Oliveira Vieira, João Lameu Silva Jr, Paula Almeida Meira, Gabriel Lima Bressan, Paulo Victor Cuesta Calvo, Harrison Silva Santana and Mauri S. A. Palma

MnO_x/CeO₂ catalysts for the low-temperature selective catalytic reduction of NO with NH₃ 6521
Shyam Sunder Rao and Sweta Sharma

Separation Processes

Multi-object optimization study on the performance of gas cyclones based on heterogeneous condensation and turbulent agglomeration. . . 6534
Jiarui Wang, Xiaocheng Peng, Chen Song, Jian Wen and Simin Wang

Combined recovery of valuable metals from LiFePO₄–LiCoO₂ system without adding oxidant and reductant 6546
Zhongqi Ren, Shuai Zheng, Ruiqi Li, Yongjian Li, Liping Dong, Xi Wu, Shichao Tian and Zhiyong Zhou

Polycardanol's potential to deasphalt crude oil: Influence of polymer conversion degree, molar mass, and structure. 6555
Maximiliano F. Martins, Thiago M. Aversa and Elizabete F. Lucas

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Diffusion coefficients and phase equilibria of carbon dioxide–ionic liquid, 1-butyl-3-methylimidazolium hexafluorophosphate ([bmim][PF₆]) system 6566
Melek Sekerci-Cetin, Omer Baris Emek, Emine Elif Yildiz and Betul Unlusu

Numerical simulations and validation of gas–solid flows in a fluidized-bed roaster based on the CFD-DPM model. 6577
Xue-Yi Ma, De-Xi Wang, Bo Liu, Hui Dong and Liang Zhao

Calculating porosity and permeability from synthetic micro-CT scan images based on a hybrid artificial intelligence 6591
Amir Mohyeddini and Mohammad Reza Rasaei

Gas holdup, bubble size distribution, and mass transfer in an airlift reactor with ceramic membrane and perforated plate distributor 6613
Yanan Zhang, Zhe Lu, Yong Qiao, Kai Guo, Wei Li, Hui Liu, Xue Li and Chunjiang Liu

Experimental estimation of the settling velocity and drag coefficient of the hollow cylindrical particles settling in non-Newtonian fluids in an annular channel 6632
Hussain Mohammad and Basudeb Munshi

Droplet splitting in multi-furcating microchannel: A three-dimensional numerical simulation study. 6641
Saikat Biswas, Partho S. G. Pattader and Tapas K. Mandal

Experimental study on energy consumption characteristics of rotational–perforated static mixers. 6656
Lichang Meng, Xuefang Gao, Dewu Wang, Yan Liu, Ruojin Wang, Baisong Hu, Meng Tang and Shaofeng Zhang

Erratum

Erratum to 'Experimental methods in chemical engineering: Zeta potential' 6672
