

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

AUGUST 2024

VOLUME 102 NUMBER 8

Issue Highlights	2647	Laminar mixing of Newtonian and non-Newtonian fluids in SMX static mixer	2768
Process Design in Chemical Engineering CFD Symposium Special Section		<i>Neelabja Gayen, Srikanth Swamy, Sridhar Hari and Shirish H. Sonawane</i>	
Process design in chemical engineering CFD symposium	2648	Interfacial and Electrochemical Phenomena	
<i>José Roberto Nunhez, Harry Van den Akker and Vivek Vinayak Ranade</i>		Impact of engineered water in modulating the wettability of oil-brine-rock system for improved oil recovery	2786
Aerosol deposition and emission from a United States Pharmacopeia-induction port when using a pressurized metered-dose inhaler with and without a valved holding chamber	2650	<i>Uma Sankar Behera, Raghav Dadhich and Jitendra S. Sangwai</i>	
<i>Yamila L. de Charras, M. Verónica Ramírez Rigo and Diego E. Bertin</i>		New Materials, Nanomaterials, and Nanotechnology Engineering	
Experimental and computational investigation of coaxial contra-rotating impellers design in baffled-free stirred reactors	2663	Performance evaluation of biodegradable polymer PHBV and PBAT blends with adjustable melt flow behaviour, heat deflection temperature, and morphological transition	2805
<i>G. S. Berestinas and J. R. Nunhez</i>		<i>Peter Zytner, Akhilesh Kumar Pal, Amar K. Mohanty and Manjusri Misra</i>	
Droplet deposition of agrochemical spraying: Comparison of results from a random-walk model and CFD simulations	2682	Process Control, Systems Engineering, and Statistics	
<i>Carlos A. Renaudo, Veronica Bucalá and D. E. Bertin</i>		Abnormal state prediction of flotation process based on dual attention mechanism and multivariate information fusion	2818
Conversations in Chemical Engineering Special Series Editor's Choice		<i>Shu Wang, Yu Fu, Lin Zhang and Xinghua Li</i>	
Chiral nematic cellulose nanocrystal composites: An organized review	2695	Monitoring dynamic process with orthonormal subspace analysis	2830
<i>Kevin J. De France</i>		<i>Zhijiang Lou, Weichen Hao, Shan Lu and Yonghui Wang</i>	
Process Safety Special Series		Taguchi method and neural network for efficient β -ketoenamine synthesis in deionized water	2840
A graph-based optimization methodology for identifying firefighting strategies aimed at domino effects	2714	<i>Wissal Ghabi, Kamel Landolsi, Fraj Echouchene, Abdullah Bajazhar, Moncef Msaddek and Hafedh Belmabrouk</i>	
<i>Nima Khakzad, Ernesto Salzano and Paul Amyotte</i>		Enhanced process monitoring for industrial coking furnace using a dual-channel pooling and homologous bilinear model-based convolutional neural network	2857
Article		<i>Chunle Hua, Yuancun Cui, Feng Wu and Ridong Zhang</i>	
Environment, Renewable Resources, Green Processes		Reaction Engineering, Chemical Kinetics, and Catalysis	
Performance of Ni/Si-MCM-41 catalysts in CO ₂ methanation	2724	The structure of deposited coke on hydrocracking and reforming catalysts: Coke deactivation and kinetics	2876
<i>Sergio Vitor Cavalcanti Trevisan, Lígia Gomes Oliveira, Rodolfo de Andrade Schaffner, Carlos Itsuo Yamamoto and Helton José Alves</i>		<i>Zaidoon Shakor, Ahmed Alasseel and Emad Al-Shafei</i>	
Industrial Applications of Chemical Engineering Principles		Separation Processes	
Modelling and dynamic simulation to produce fermentable sugars from lignocellulosic substrates through dilute acid hydrolysis	2739	An overview of metals extraction and recovery from industrial wastewater sludge	2892
<i>Luis Antonio Velázquez-Herrera, José Ángel Cobos-Murcia, Eusebio Bolaños-Reynoso and Leticia López-Zamora</i>		<i>M. Al-Mutair, Rajeev Kumar, Bandar A. Al-Mur, Olfat A. Mohamed and M. A. Barakat</i>	
A new pressure control scheme on steam-assisted gravity drainage for heavy oil production	2754	Recovery of valuable metals from cathode materials of spent ternary lithium-ion battery using natural product as reducing reagent	2909
<i>Xinfeng Jia, Kangkang Wang, Jian Xiong, Binhai Jiao, Dong Liu, Zhangxin Chen, Liangliang Jiang and Zhanxi Pang</i>		<i>Liping Dong, Yongjian Li, Pei Shi, Shichao Tian, Zhongqi Ren and Zhiyong Zhou</i>	

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Numerical simulation of inter-stage of multistage centrifugal pump by varying number of blades 2921
Darvesh Yadav, Raj Kumar Singh and Manjunath Kumarswamy

A steady two-dimensional cylindrical mass transport model to determine binary gas diffusivities: A proof-of-concept theoretical development. 2936

Carlos A. Ramírez

CFD study on flow characteristics of sieve tray columns with circular downcomers 2948

Huihui Su, Enlu Wang and Yifei Xu
