

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

NOVEMBER 2024

VOLUME 102 NUMBER 11

Issue Highlights	3675	Transesterification reactions as a means to produce esters: A critical review	3787
Process Safety Special Series		<i>Reshma R. Devale and Yogesh S. Mahajan</i>	
A holistic approach for assessing occupational health risk due to fugitive emissions in petrochemical processes: Inherent health hazard level index (IHHLI)	3676	Effect of ceria morphology on hydrogen production via methane steam reforming for membrane reformer	3803
<i>Yousef A. Alhamdani, Mimi H. Hassim and Salim M. Shaik</i>		<i>Anjali Baudh, Meenakshi Garjola, Rahul Sharma, Sweta Sharma and Rajesh Kumar Upadhyay</i>	
Identifying design criteria for implementing inherent safety in chemical process industries part 1: Design reasoning	3692	Kinetics of cashew apple drying through mechanistic models and analysis of the effects of drying conditions on the retention of bioactive compounds	3817
<i>Zafirah Zakaria, Kamarizan Kidam and Mimi H. Hassim</i>		<i>Vikramaditya R. Shirsat, Prakash D. Vaidya, Vishwanath H. Dalvi, Rekha S. Singhal, Anil K. Kelkar and Jyeshtharaj B. Joshi</i>	
Perspectives in Chemical Engineering Special Series		Development of new correlation for the prediction of power number for closed clearance impellers using machine learning methods trained on literature data	3832
Perspectives on 40-year careers—University of Calgary Chemical & Petroleum Engineering graduating class of 1983	3702	<i>Sumit S. Joshi, Vishwanath H. Dalvi, Vivek S. Vitankar, Jyeshtharaj B. Joshi and Aniruddha J. Joshi</i>	
<i>Robert E. Wichert, Anil K. Mehrotra and Gregory S. Patience</i>		Effects of segmentation in composite phase change material on melting/solidification performance of triplex-tube thermal energy storage systems	3852
Sustainable Development in Chemical and Environmental Engineering Special Issue Section Editor's Choice		<i>Md Tabrez Alam, Rajesh Kumar and Anoop K. Gupta</i>	
Preface to the special issue of the International Conference on Sustainable Development in Chemical and Environmental Engineering (SDCEE-2024)	3711	Optimal design of coolant jacket for cryogen transfer pipelines	3867
<i>Avinash Chandra</i>		<i>Sajikumar Pillai Sivasree and Baby Nitin</i>	
Understanding the effect of reaction parameters on the production of levulinic acid from glucose	3713	Mixed convective viscous dissipative flow of Casson hybrid nanofluid with variable thermal conductivity at the stagnation zone of a rotating sphere	3879
<i>Ketaki S. Nalawade and Parag R. Gogate</i>		<i>Tanvi Singla, Bhuvaneshvar Kumar and Sapna Sharma</i>	
Optimizing delignification and saccharification process for sawdust processing using a central composite design	3723	Article	
<i>Priya Yadav, Julie Kring and Parag R. Gogate</i>		Biotechnology, Biochemical, and Biomedical Engineering	
Catalytic pyrolysis of pine needles: Role of zeolite structure and SiO ₂ /Al ₂ O ₃ ratio on bio-oil yield and product distribution	3734	Semi-continuous non-sterile production of medium chain-length polyhydroxyalkanoates from fatty acids	3896
<i>Omvesh Yadav, Meenu Jindal, Richa Bhatt, Akul Agarwal, Bhaskar Thallada and Venkata Chandra Sekhar Palla</i>		<i>Warren Blunt, Alain Lagassé, Jacob Harvey, Richard Sparling, Daniel Gapes, David Levin and Nazim Cicek</i>	
Effects of viscous dissipation, temperature dependent thermal conductivity, and local thermal non-equilibrium on the heat transfer in a porous channel to Casson fluid	3744	Industrial Applications of Chemical Engineering Principles	
<i>Rajvinder Kaur, Sapna Sharma and Avinash Chandra</i>		Simulation study of the electrothermal field in a chloride electrolysis cell with 16 electrode pairs	3909
Forced convection heat transfer from confined circular/semi-circular heaters and coolers with various orientations	3756	<i>Qian Liu, Taixi Feng, Shigui Zhu and Guimin Lu</i>	
<i>Rajvinder Kaur, Sapna Sharma and Avinash Chandra</i>		A review of scale inhibitor methods during modified smart water injection	3922
Generation of biosurfactants by <i>P. aeruginosa</i> gi [KP163922] on waste engine oil in a free and immobilized cells system	3776	<i>Seyedeh Fatemeh Ghazi Ardakani, Seyed Taha Hosseini and Yousef Kazemzadeh</i>	
<i>Mohan Jujaru, Kajol Pradhan, Shailee Gaur, Amit Jain and Sushil Kumar</i>			

Application of machine learning on hydrate formation prediction of pure components with water and inhibitors solution 3953
Qazi Nasir, Humbul Suleman and Wameath S. Abdul Majeed

Performance and mechanism of DL-alanine ionic liquid shale inhibitor 3982
Liu Feng, Wang Bo, Han Chunshuo, Du Jia, Wang Yu, Zhou Weiqiang, Du Weichao and Wang Quande

The effect of PVP and PVA on hydrate formation kinetics of ethane and propane mixture in the presence of kaolin nanoparticles 3994
J. Kiani, P. Gholami, F. Makenali and M. Bahrani

New Materials, Nanomaterials, and Nanotechnology Engineering

Synthesis of low cost cathode electrocatalyst Pt-Ni/C_{AB} using DMSO as a solvent for low temperature proton exchange membrane fuel cell application 4007
Abhay Pratap Singh and Hiralal Pramanik

Process Control, Systems Engineering, and Statistics

Fault diagnosis for blast furnace ironmaking process based on randomized local fisher discriminant analysis 4026
Jiawei Zhou, Ping Wu, Hejun Ye, Yunpeng Song, Xianbao Wu, Yuchen He and Haipeng Pan

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Mass transfer and bubble hydrodynamics in stirred tank with multiple properties fluid via a CFD-PBM method 4038
Hao Chen, Zhe Chen, Xu-Qing Wang, Xiu-Guang Yi, Xi-Bao Zhang and Zheng-Hong Luo

Leakage characteristics of plug flow in the case of pipe leakage 4055
Tao Ren, Wenjun Ma, Jiangbei Huang, Zhiwei Li and Bin Sun
