

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

DECEMBER 2024

VOLUME 102 NUMBER 12

Issue Highlights 4071

Process Safety Special Series

Application of uncertainty quantification techniques in the framework of process safety studies: Advanced dispersion simulations 4072
Marco Bellegoni, Giulia Marroni, Alessandro Mariotti, Maria Vittoria Salvetti, Gabriele Landucci and Chiara Galletti

Integrating process safety management into Canadian wood pellet facilities that generate combustible wood dust 4085
Kayleigh Rayner Brown, Bill Laturnus, Gordon Murray, Fahimeh Yazdanpanah, Chris Cloney and Paul Amyotte

Organic and Printed Electronics Special Issue Section Editor's Choice

Preface to the Organic and Printed Electronics Special Issue Section 4104
Benoît H. Lessard

Effect of pre-aging intermediate layers on the performance of multi-layer organic photovoltaic devices 4106
Emma Su, Adam R. Tetreault, Lili Zheng, Marzieh Riahinezhad, Itzel Lopez-Carreón, Elnaz Esmizadeh, Peter Collins and Timothy P. Bender

Air processed, high open-circuit voltage indoor organic photovoltaic cells based on side chain modified N-annulated perylene diimides 4120
Maryam Nazari, Edward Cieplechowicz and Gregory C. Welch

Stability assessment of PTB7-Th and a quinoxaline-based polymer in both organic thin film transistors and in organic photovoltaic devices 4129
Audrey Laventure, Samantha Bixi, Gregory C. Welch and Benoît H. Lessard

Synthesis of fluorene-flanked diketopyrrolopyrrole-based semiconducting polymers with thermocleavable side chains and their application in organic field effect transistors 4137
Ravinder Singh, Samala Venkateswarlu, YuFang Zhong and Yuning Li

Towards sustainable, direct printed, organic transistors with biocompatible copolymer gate dielectrics 4152
Roslyn Massey, Xiaoyu Song, Shiva Ashoori, Jingwen Guan and Ravi Prakash

Printing organic-field effect transistors from semiconducting polymers and branched polyethylene 4166
Gage T. Mason, Daniella Skaf, Anindya L. Roy, Rahaf Nafez Hussein, Tiago Carneiro Gomes, Eric Landry, Peng Xiang, Konrad Walus, Tricia Breen Carmichael and Simon Rondeau-Gagné

Article

Environment, Renewable Resources, Green Processes

Desorption of rare earth elements biosorbed on *Euglena mutabilis* suspensions and biofilms 4175
Mitchell T. E. Zak, Nicolas A. R. Carunungan, Vladimiro G. Papangelakis and D. Grant Allen

Conversion of tailings solvent recovery unit (TSRU) by-products into activated carbon-zeolite composites: Impact of fusion pre-treatment on porosity and CO₂ capture 4183
Mohammad Hashem Sedghkedar, Umang Patel and Nader Mahinpey

An optimization of Cs₂TiBr₆ perovskite solar cell using SCAPS-1D simulation based on genetic algorithm 4193
Xiaoya Liu, Zhengxin Chen, Hairong Wang, Zhengrong Zhu, Sirui Zhao, Lingchen Kong, Haitao Man, Kai Huang, Jiang Wu and Yang Ling

Designing a heavy metal electrochemical sensor for Pb detection in water—A generalized approach for electrochemical sensing using low-cost materials 4203
Singuru Rajesh and Adhidesh S. Kumawat

Industrial Applications of Chemical Engineering Principles

Numerical and experimental study of homogenization mechanism of high shear rotor-stator mixer 4216
Jiaqiong Wang, Yusha Huang, Ruijie Zhang and Ling Zhou

The impact of particle size distribution of haematite-based drilling fluid on perlite functionality 4230
Jaber Al Jaber, Badr Bageri, Yazeed Alshehri and Waleed Otain

New Materials, Nanomaterials, and Nanotechnology Engineering

Omniphobic/superhydrophobic surface effect on oil and gas flow: A critical review 4241
Mehedi Hasan, Baojiang Sun, Mihoubi Bahaeddine, Youran Liang, Moses Damulira and Litao Chen

Process Control, Systems Engineering, and Statistics

Dimensionality reducing Gaussian mixture-based reconstruction for fault detection in multimode processes 4267
Yanfeng Cui, Wei Fan and Yongzan Zhou

Dynamic scenario deduction analysis for hazardous chemical accident based on CNN-LSTM model with attention mechanism 4281
Guohua Chen, Xu Ding, Xiaoming Gao, Xiaofeng Li, Lixing Zhou, Yimeng Zhao and Hongpeng Lv

New PID parameter tuning based on improved dung beetle optimization algorithm 4297
Chonggao Hu, Feng Wu and Hongbo Zou

Chemical process fault detection and trend analysis based on KESN 4317
Yuping Cao, Rui kang Cheng, Xiaogang Deng and Ping Wang

Reaction Engineering, Chemical Kinetics, and Catalysis

Impact of pressure on coking of vacuum residue 4333
Jing Shen, Roshni Sajiv Kumar, Jason Wiens, Michael Wormsbecker and Natalia Semagina

Nitrogen-containing microporous carbon with specific morphology for non-metallic catalytic NO oxidation at room temperature: The effect of morphology and nitrogen doping 4347
Jie Guan, Yujie Zhu, Jitong Wang, Xiaomin Cheng, Cheng Ma, Licheng Ling and Wenming Qiao

Separation Processes

Insight into CO₂ capture by aqueous solutions of N,N-diethylethanolamine promoted with potassium salts of amino acids 4359
Hitesh D. Rawate and Prakash D. Vaidya

Enhancing the efficiency of two-stage cyclones without increasing pressure drop by optimizing inlet and outlet dimensions 4371
Jiongjie He, Zhenxing Zhu, Hongbin Niu, Zhihong Tian, Jingxuan Yang and Guogang Sun

Optimizing removal of elemental mercury from flue gas using halide-impregnated red mud 4386
Muhammad Sarfraz, Yang Li, He Yang, Lijun Jin and Haoquan Hu

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Novel methodology to couple decline curve analysis with CFD reservoir simulations for complex shale gas reservoirs 4401
Syed Oubei Khadri, Mohammed J. Al-Marri, Mustafa Nasser, Fadhil Sadooni, Ezeddin Shirif and Ibelwaleed A. Hussein

Understanding two-phase flow behaviour: CFD Assessment of silicone oil–air and water–air in an intermediate vertical pipe 4416
Prantik Mondal, Sandip Kumar Lahiri and Kartik Chandra Ghanta

Effect of ionic liquid on CH₄ hydrate formation thermodynamics 4440
Gang Yue, Yu Liu, Yong-hua Qin, Zong-ming Tian, Xin-mei Zhao, Xiao-xue Liu, Zhen Du, Xin-bo Zhang and Xu-qiang Guo

Research on multi-mechanism synergistic effects of gas cross-scale percolation in tight gas reservoirs of Yanchang oilfield 4452
Lijun Gao, Ning Bai, Linsheng Qiao, Wei Ji and Tao Miao
