

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

MARCH 2025

VOLUME 103 NUMBER 3

Issue Highlights 983

Artificial Intelligence + Machine Learning Applications in Chemical Engineering Special Issue Section Editor's Choice

Preface to the special issue section: Artificial intelligence and machine learning applications in chemical engineering 984
Simant Upreti

Reliable modelling of the sulphur properties to calculate the process parameters of the Claus sulphur recovery plant 986
Mohammad M. Ghiasi, Sohrab Zendejboudi, Amir H. Mohammadi, Mahdi Nikkhahi, Ali Lohi and Ioannis Chatzis

Artificial intelligence and machine learning at various stages and scales of process systems engineering 1004
Karthik Srinivasan, Anjana Puliyaanda, Devavrat Thosar, Abhijit Bhakte, Kuldeep Singh, Prince Addo, Rajagopalan Srinivasan and Vinay Prasad

Assuring optimality in surrogate-based optimization: A novel theorem and its practical implementation in pressure swing adsorption optimization 1036
Carine Menezes Rebello, Erbet Almeida Costa, Antonio Santos Sánchez, Fredy Vides and Idelfonso B. R. Nogueira

The use of artificial intelligence in liquid crystal applications: A review 1060
Sarah Chattha, Philip K. Chan and Simant R. Upreti

Molecular simulations and deep neural networks-based interpretable machine learning modelling of reverse adsorptive MOFs for ethane/ethylene separation 1083
Khushboo Yadava, Shrey Srivastava and Ashutosh Yadav

Integrating autoencoder with Koopman operator to design a linear data-driven model predictive controller 1099
Xiaonian Wang, Sheel Ayachi, Brandon Corbett and Prashant Mhaskar

Robust optimization of cascaded MSMPR crystallization unit using unsupervised machine learning 1112
Ravi Kiran Inapakurthi and Kishalay Mitra

Data-driven nonlinear state observation for controlled systems: A kernel method and its analysis 1122
Moritz Woelk and Wentao Tang

All-nonlinear static-dynamic neural networks versus Bayesian machine learning for data-driven modelling of chemical processes 1139
Angan Mukherjee, Samuel Adeyemo and Debangsu Bhattacharyya

Effective approach to assess higher heating value of biomass from ultimate and proximate analysis 1155
Mohammad M. Ghiasi, Omid Mohammadzadeh, Sohrab Zendejboudi and Hedia Fgaier

Application of artificial neural networks and Langmuir and Freundlich isotherm models to the removal of textile dye using biosorbents: A comparative study among methodologies 1169
Gustavo Petrolí, Vitória Brocardo de Leon, Michele Di Domenico, Fernanda Batista de Souza and Claiton Zanini Brusamarello

A machine learning approach for modelling and optimization of complex systems: Application to condensate stabilizer plants 1183
Mohammed Alkatheri, Farzad Hourfar, Ladan Khoshnevisan, Hedia Fgaier, Ali Almansoori and Ali Elkamel

Reconstruction error-based fault detection of time series process data using generative adversarial auto-encoders 1213
Jyoti Rani, Umang Goswami, Hariprasad Kodamana and Prakash Kumar Tamboli

A new intelligent prediction model using machine learning linked to grey wolf optimizer algorithm for O₂/N₂ adsorption 1229
Hossein Mashhadimoslem, Vahid Kermani, Kourosh Zanganeh, Ahmed Shafeen and Ali Elkamel

Cybersecurity and process safety synergy: An analytical exploration of cyberattack-induced incidents 1246
He Wen and Faisal Khan

Exploiting the prediction of mass transfer performance in aerated coaxial mixers containing biopolymer solutions using empirical correlations and neural networks 1258
Paloma L. Barros, Farhad Ein-Mozaffari, Ali Lohi and Simant Upreti

Article Biotechnology, Biochemical, and Biomedical Engineering

Rapid determination of the antimicrobial properties of surfaces using an enzymatic activity surrogate 1276
Shazia Tanvir, Amandeep Kaur and William A. Anderson

Environment, Renewable Resources, Green Processes

Effects of cellulose addition on sodium lignosulfonate pyrolysis: Product distribution and formation pathway 1285
Lichao Ge, Can Zhao, Yang Wang, Zhifu Qi, Ruikun Wang, Qianqian Yin, Yuli Zhang and Chang Xu

Industrial Applications of Chemical Engineering Principles

Fuzzy averaging level control for tight product quality control 1295
Aayush Gupta, Prakhar Srivastava and Nitin Kaistha

New Materials, Nanomaterials, and Nanotechnology Engineering

Impact of raw material on thermo-physical properties of carbon foam 1309
Mohammad Rajab Al-Majali, Mingcong Zhang, Yahya T. Al-Majali and Jason P. Trembly

Process Control, Systems Engineering, and Statistics

Physics-informed neural networks guided modelling and multiobjective optimization of a mAb production process. 1319
Md Nasre Alam, Anurag Anurag, Neelesh Gangwar, Manojkumar Ramteke, Hariprasad Kodamana and Anurag S. Rathore

Stacked dynamic target regularization enhanced autoencoder for soft sensor in industrial processes 1335
Xiaoping Guo, Xiaofeng Zhao and Yuan Li

A new design of double predictive proportional integral control strategy for first order plus dead time industrial processes 1349
Chonggao Hu, Yuqiao Hou, Jianjun Bai and Hongbo Zou

Separation Processes

Use of molecular simulation to design modification of a chromium-based MOF for adsorptive removal of inhalation anaesthetic agents 1363
Masoud Haeri-Nejad and Mladen Eic

A critical review of membranes made of nanofibres polymeric materials for application of treating oily wastewater. 1375
Thamer Diwan, Mustafa H. Al-Furaiji, Zaidun N. Abudi, Mohammed Awad and Qusay F. Alsalhy

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Machine learning and metaheuristics in microfluidic transport characterization and optimization: CFD and experimental study integrated with predictive modelling 1400
Afshin Kouhkord, Moheb Amirmahani, Faridoddin Hassani and Naser Naserifar

Investigation of instability in the dynamic behaviour of a bubble 1419
Qiang Li, Shaobo Lu, Jialin Liu, Mao Lei, Jiahao Gao and Weiwei Xu

Predicting three phase (hydrate–liquid–vapour) equilibria of mixed hydrates in guest gas swapping: AI-based approach versus physical modelling 1433
Gauri Shankar Patel and Amiya K. Jana

A study on enhancing oil recovery efficiency through bubble displacement based on microfluidic technology 1450
Fan Xu, Yujie Jin and Yiqiang Fan
