

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

APRIL 2025

VOLUME 103 NUMBER 4

Issue Highlights 1463

Norman Epstein Memorial Special Issue Section

Special section in honour of Professor Norman Epstein of the University of British Columbia 1464
João B. P. Soares

Gnireteet 1466
David R. Bruce

Editor's Choice

A review on applications of fine particles integrated with fluidization technologies 1474
Yue Song, Yue Yuan and Jesse Zhu

Fluidized bed applications and modern scale-up tools for the energy transition 1494
Todd Pugsley

Multi-scale study of fluidized bed-chemical vapour deposition process in nuclear fuel coated particle fabrication for high-temperature gas-cooled reactor: A review 1502
Zefan Yan, Lin Jiang, Yu Tian, Rongzheng Liu, Youlin Shao, Bing Liu and Malin Liu

From circular to square-based section spouted beds: Scale-up and design overview of a multistage thermal unit 1518
Giorgio Rovero, Massimo Curti, Cristina Moliner and Elisabetta Arato

Process simulation on oxy-fuel combustion of coal and biomass in a circulating fluidized bed 1535
Xuejiao Liu, Zecheng Liu, Yun Hu and Wenqi Zhong

Sustainable dye extraction: Annatto powder production in a fountain confined spouted bed 1550
Natalia Pazin Almeida, Cláudio Roberto Duarte, Mikel Tellabide, Idoia Estiati, Martín Olazar and Marcos Antonio de Souza Barrozo

Bioactive dry extract production from *Hymenaea courbaril* L. bark via spouted bed drying 1562
Claudia R. F. Souza, Fabiana Fregonesi and Wanderley P. Oliveira

Cohesive particle–fluid systems: An overview of their CFD simulation 1582
Filippo Marchelli, Luca Fiori and Renzo Di Felice

Towards a more sustainable future: Transitioning from thermochemical to electrochemical processes in clean energy technologies relevant to hydrogen-containing fuels 1602
Jasna Jankovic and David P. Wilkinson

Ammonium crossover as a function of membrane type and operating conditions in flow cells for ammonia synthesis and water treatment applications 1623
Wei Bi, Wenbo Bao, Elöd Gyenge and David P. Wilkinson

A kinetics study of microwave pyrolysis of sewage sludge and corn stalk mixture 1640
Jushen Qu, Yang Liu, Jie Fu, Hejie Yu, Jianjun Dai and Xiaotao Bi

Article

Biotechnology, Biochemical, and Biomedical Engineering

Microorganisms usage in enhanced oil recovery: Mechanisms, applications, benefits, and limitations 1654
Hamed Nikraves, Yousef Kazemzadeh, Atefeh Hasan-Zadeh and Ali Safaei

Environment, Renewable Resources, Green Processes

Optimizing hydrothermal carbonization for enhanced energy production from algal biomass with high moisture content 1673
Kanta Nakano, Numan Luthfi, Takashi Fukushima and Kenji Takisawa

Modelling and optimization of amoxicillin degradation over ZnO and glucose oxidase modified TiO₂ nanowire 1683
Somayeh Sohrabi and Mostafa Keshavarz Moraveji

Industrial Applications of Chemical Engineering Principles

Empirical prediction on boilover onset and impact for liquid hydrocarbon fire in atmospheric storage tank 1701
Azizul Buang, Muhammad Ameer Zaaba, Muhammad Izham Mohd Yusof, Daneskumar Manogaran, Hani Tiara Faihana Hifni and Muhammad Roil Bilad

New Materials, Nanomaterials, and Nanotechnology Engineering

Properties of blends of amorphous and semicrystalline PLAs containing multiwalled carbon nanotubes 1711
Mojtaba Mohammadi, Mohammadreza Nofar and Pierre J. Carreau

Composite nanocapsules of phase change materials using a supercritical carbon dioxide (SC-CO₂) assisted process 1723
Ida Palazzo, Gianluca Viscusi, Giuliana Gorrasi and Ernesto Reverchon

A comprehensive insight into metal oxide nanoparticle synthesis, associated regulations, and application in the agri-food sector 1736
Charles Wroblewski, Rahul Islam Barbhuiya, Guneet Kaur, Gopu Raveendran Nair, Abdallah Elsayed and Ashutosh Singh

The use of graphene nanoplatelet-embedded PA-6 nanofibres to remove turbidity from water 1752
Ahmet Alp Zembat, Elifnur Gezmiş-Yavuz, Derya Y. Koseoglu-Imer and C. Elif Cansoy

Process Control, Systems Engineering, and Statistics

A novel fault diagnosis framework empowered by LSTM and attention: A case study on the Tennessee Eastman process 1763
Shuaiyu Zhao, Yiling Duan, Nitin Roy and Bin Zhang

Application of machine learning in monitoring fouling in heat exchangers in chemical engineering: A systematic review	1786
<i>Lucas Villa and Claiton Zanini Brusamarello</i>	
Nonlinear dynamic process monitoring based on latent mapping embedding deep neural networks.	1802
<i>Zhenhua Yu, Wenjing Wang, Xueting Wang, Qingchao Jiang and Guan Wang</i>	
DBFact applied to minimum variance performance assessment for nonminimum phase multivariate systems from closed-loop data.	1813
<i>Maria Lima, Jorge Otávio Trierweiler and Marcelo Farenzena</i>	
Three-layer deep learning network random trees for fault detection in chemical production process.	1835
<i>Ming Lu, Zhen Gao, Ying Zou, Zuguo Chen and Pei Li</i>	
Dual-noise autoencoder combining pseudo-labels and consistency regularization for process fault classification.	1853
<i>Xiaoping Guo, Qingyu Guo and Yuan Li</i>	
Reaction Engineering, Chemical Kinetics, and Catalysis	
Usefulness of insights into the kinetic compensation effects in the kinetic analysis of the coal gasification process	1868
<i>Manoj Kumar Jena, Vineet Kumar and Hari Vuthaluru</i>	

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Thermodynamic modelling of gas hydrate dissociation conditions in porous medium in the presence of NaCl/methanol aqueous solution	1880
<i>Samira Hashemzadeh, Jafar Javanmardi, Ali Rasoolzadeh and Amir H. Mohammadi</i>	
Pressure loss in packed beds of multicomponent mixtures of flat particles with particle overlap, including random chips	1890
<i>Evangelina Schonfeldt and William L. H. Hallett</i>	
Coalescence investigations in a small-scale continuously operated setup for bubble column design	1902
<i>Mark Werner Hlawitschka, Andreas Schleiffer, Jonas Schurr, Stephan Winkler and Daniel Danner</i>	
Numerical study of gas–solid flow characteristics of cylindrical fluidized beds based on coarse-grained CFD-DEM method	1917
<i>Zhong Tang, Zhenzhong Li, Shanglong Huang and Chen Yang</i>
