

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

OCTOBER 2025

VOLUME 103 NUMBER 10

Issue Highlights 4627

Process Safety Special Series

Editor's Choice

A systematic approach for identifying drivers of critical safety and establishing their hierarchy 4628
Mohammad Zaid Kamil, Faisal Khan and Paul Amyotte

Article

Biotechnology, Biochemical, and Biomedical Engineering

Hydrogel microwells with customizable bottom design: A one-step approach to spheroid formation. 4647
Ahmad A. Manzoor, Omar M. Rahman, Roberto Tarantino, Peter Zastawny, Stephen D. Waldman and Dae Kun Hwang

Environment, Renewable Resources, Green Processes

Weighing risks against GHG reduction benefits in emerging green technologies 4661
Federica Tamburini, Valerio Cozzani, Nicola Paltrinieri and Thomas Alan Adams II

Biodiesel production as an alternative for energetic valorization of biomass from poultry wastewater through *Chlorella vulgaris* and Novozyme 435 4681
Nayeli Gutiérrez-Casiano, Eduardo Hernández-Aguilar and Juan M. Méndez-Contreras

Industrial Applications of Chemical Engineering Principles

Density, viscosity, and stability of products from combinations of visbreaking and deasphalting 4694
Jose Beleno, Florian F. Schoeggel, Darius Remesat and Harvey W. Yarranton

An innovative method on synthesis of carbon-zeolite porous composite from tailings solvent recovery units and its utilization in the CO₂ adsorption process 4708
Umang Patel, Mohammad Hashem Sedghkarder and Nader Mahinpey

Bridging academia and industry: A comprehensive review of advances, gaps, and future directions of fault detection and diagnosis (FDD) systems in the chemical industry 4718
Sumana Roy, Pratyush Kumar Pal, Somasish Saha, Narottam Behera and Sandip Kumar Lahiri

Dynamic soft sensor modelling based on data imputation and spatiotemporal attention. 4751
Shiwei Gao, Pengxue Yun, Wenbo Yang and Jing Yan

New Materials, Nanomaterials, and Nanotechnology Engineering

Synthesis of uniform core-shell calcium hydroxide-calcium carbonate biocidal particles via encapsulation into dry ice 4774
Noora Darwish, Mehdi Mohammadi Ashani, Ahmed Mehairi, Ian A. Lewis and Maen M. Husein

Controlling polymer addition flowrate to improve the flocculation of kaolinite suspensions as models for oil sands mature fine tailings 4786
Kilian Slöetjes and João B. P. Soares

Investigation of selective denitrogenation of liquid fuel with different MIL-101 adsorbents. 4803
Mohamad Songolzadeh, Mansoor Soleimani and Maryam Takht Ravanchi

Process Control, Systems Engineering, and Statistics

Chemical process safety domain knowledge graph-enhanced LLM for efficient emergency response decision support. 4814
Chen Zheng, Guohua Chen, Honghao Chen, Qiming Xu, Yimeng Zhao, Yuanfei Zhao and Yunfeng Yang

Simulation study on atomization characteristics of swirl nozzle for dust removal of coke dry quenching 4844
Bochen Xie, Xucheng Zhang, Jiayu Zhu, Peng Liang, Zhining Zhang, Yaling Wang and Yaqing Zhang

A novel ensemble network based on CNN-AM-BiLSTM learner for temperature prediction of distillation columns 4859
Jianji Ren, Linpeng Fu, Yanan Li, Yongliang Yuan, Haiqing Liu, Zhenxi Wang, Yunfeng Chen and Guojun Deng

Fault diagnosis method for chemical processes based on variable correlation-guided convolutional neural networks 4874
Zhe Zhou, Hongwei Yu, Li Yang, Zuxin Li and Chenglin Wen

Lyapunov-based adaptive state-space controller for liquid level control of a coupled tank system with unknown model 4890
Armin Lotfieglim, Hayriye Tuğba Sekban and Abdullah Başçi

Prediction control of CO₂ capture in coal-fired power plants based on ERIME-optimized CNN-LSTM-multi-head-attention. 4904
Minan Tang, Chuntao Rao, Tong Yang, Zhongcheng Bai, Yude Jiang, Yaqi Zhang, Wenxin Sheng, Zhanglong Tao, Changyou Wang and Mingyu Wang

A modified double-latent variable probabilistic model for monitoring of dynamic processes with multiple sampling rates. 4925
Ze Ying, Yuqing Chang, Fuli Wang and Yuchen He

Quality-related process monitoring approach based on sparse autoencoder and comprehensive KPLS. 4939
Yikai Xue, Haipeng Pan, Ping Wu, Zhenyu Ye, Haiyun Zhou and Zhenquan Wu

An improved dynamic matrix control with output penalty for industrial processes 4952
Sen Hong, Jianjun Bai and Hongbo Zou

A deep-learning model based on MFE-Transformer for chemical process fault detection 4968
Ying Xie, Xiaotong Wu, Yingjie Zhu and Yuan Zhu

Multi-scale feature fusion network-based industrial process fault diagnosis method using space-time capsule and classifier optimization 4989
Yue Zhao, Jianjun Bai, Hongbo Zou and Jing Feng

An online monitoring-based adaptive quality control framework for a continuous pharmaceutical cyber-physical system 5012
Zhengsong Wang, Xiaochen Li, Xue Wang, Yanqiu Yang, Ge Guo and Meng Han

Reaction Engineering, Chemical Kinetics, and Catalysis

NHPI catalyzed air oxidation of cyclohexanone: Mechanism and kinetics study. 5028
Guanwen Chen, Bo Yuan, Ruolin Wang, Min Yang, Zhanke Wang and Guangxu Zhang

Generalizable global kinetic model for catalyst synthesis–structure–activity relationships: Application to C_3H_6 -SCR of NO_x 5039
Shivaraj Kumar Kummari, Parasuraman Selvam, Niket S. Kaisare and Preeti Aghalayam

A kinetic model to predict the catalyst lifetime in methanol to olefins conversion. 5056
Saeed Sahebdehfar and Farhad Khorasheh

Separation Processes

Analytical modelling of the permeability of filter media exhibiting a bimodal fibre diameter distribution—Beyond empirical models 5065
Félicie Theron, Walid Mrad, Aurélie Joubert, Fatma Haouas, Sonia Woudberg, John Puentes and Laurence Le Coq

Optimization of ion exchange cryogel functionalization via the epoxy method for protein adsorption from ora-pro-nobis (*Pereskia aculeata*) 5081
Mariana Oliveira Mendes, Ana Cristina Freitas de Oliveira Meira, Paula Chequer Gouveia Mól, Isabelle Cristina Oliveira Neves, Luis Antonio Minim, Jaime Vilela de Resende and Lizzy Ayra Alcântara Veríssimo

Enhanced extraction of flaxseed oil, tocopherols, and fatty acids using supercritical carbon dioxide with ethanol: Process optimization and modelling. 5094
Aimin He, Nicky Rahmana Putra and Lailatul Qomariyah

Efficient elevated temperature hydrogen direct purification and separation technology 5112
Yurui Wang, Peixuan Hao, Dongdong Wang, Fuhua Xu, Tongyu Liu, Lu Wang, Shuang Li, Yixiang Shi and Ningsheng Cai

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Impact of slug length in gas–liquid two-phase flow on the structural stress characteristics of horizontal rigid pipelines 5124
Abdellah O. Mohammed, Hussain H. Al-Kayiem and Abderraouf Arabi

Dynamic characteristics of active stock in a circulating fluidized bed boiler based on unsteady state conditions 5143
Xin Shen, Tianyi Chen, Xiaoqian Li, Yue Guo, Hairui Yang and Yan Jin

Study on the distribution of critical liquid bridge length in droplet formation under dripping regime in an annular shear flow field 5159
Yannan Sun, Mingyang Zhang, Jie Cheng, Shujuan Ma, Wenjie Zhu, Yaojun Guo and Jinhui Zhu
