

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

NOVEMBER 2025

VOLUME 103 NUMBER 11

Issue Highlights 5171

Catalysis for Decarbonization Special Issue Section Editor's Choice

Preface to the Catalysis for Decarbonization Special Issue Section 5172
Clémence Fauteux-Lefebvre, Bruna Rego de Vasconcelos and Ying Zheng

A new green synthesis approach using sodium palmitate in the synthesis of a Ni/Al₂O₃ catalyst for CO₂ methanation 5173
Anderson F. C. Silva, Eduardo L. de Barros Neto and Bruna R. de Vasconcelos

Optimization of lipolysis variables of tengkawang seed fat (illipe butter) using frangipani resin derived lipase 5189
Fikra Hanifah, Astri Nur Istyami, Meiti Pratiwi, Dwi Hantoko and Tirta Prakoso

Highly active and stable Ru-promoted Ni/CeO₂ catalysts for CO₂ methanation reaction 5203
Nagasuresh Enjamuri, So Nishikawa, Masahiko Nishijima, Shohei Tada and Ryuji Kikuchi

A catalytic sites contiguity study on atomically-dispersed ZnO-Cu/SiO₂ catalysts to improve methanol formation from CO₂ hydrogenation 5218
Jingye Chen, Mohsen Shakouri, Mehryana Alizadeh, Chi Cong Tran, Nan Zou, Serge Kaliaguine, Ying Zheng and Hui Wang

Article

Biotechnology, Biochemical, and Biomedical Engineering

Multi-attention key-factor-aware convolutional neural network developed for quality prediction of batch processes tackling data sampled at various frequencies 5231
Yufeng Dong and Xuefeng Yan

Environment, Renewable Resources, Green Processes

Antibacterial and antiviral activity of a highly efficient electrospun r-PET nanofiber 5249
Karine Machry, Danilo M. Melo, Daniela Patrícia Freire Bonfim, Paulo Augusto Marques Chagas, Felipe de Aquino Lima, Clovis Wesley Oliveira de Souza, Luiz Tadeu Moraes Figueiredo, Mônica Lopes Aguiar and André Bernardo

Study on the effect of co-plasticization of post-industrial starch for high-impact thermoplastic starch development 5264
Aarsha Surendren, Amar K. Mohanty, Loong-Tak Lim, Qiang Liu, Bassim Abbassi and Manjusri Misra

Fast adsorption of methylene blue and crystal violet from aqueous solution by sustainable biosorbent (pine needle of *Pinus nigra* Arn.): Kinetics, equilibrium, and thermodynamics study 5277
Talip Turna

Innovative approaches in adsorbent production through pyrolysis of waste biomass: Effective parameters, modifications, and techno-economic analysis 5296
Behnam Rezvani

Industrial Applications of Chemical Engineering Principles

Investigation on the performance optimization of sludge spray nozzles based on computational fluid dynamics coupled with discrete phase model 5321
Yongkang Hao, Xiaoyu Li, Yuekan Zhang, Anjun Li, Bo Chen and Peikun Liu

Numerical investigation of distribution uniformity of solid particles in a gas-solid counter flow contact cyclone reactor under cold flow conditions for methanol to propylene 5332
Mingyang Zhang, Yannan Sun, Guowei Feng, Jie Cheng, Wenjie Zhu, Yaojun Guo and Xue Xiao

In situ hydrolysis for dihydroxystearic acid production from catalytic epoxidation of oleic acid 5347
Ismail Md. Rasib, Intan Suhada Azmi and Mohd Jumain Jalil

New Materials, Nanomaterials, and Nanotechnology Engineering

Study of biodegradable poly(butylene succinate-co-adipate) (PBSA) maleation: Analysis of grafting, thermal, and rheological behaviour 5357
Fatemeh Jahangiri, Debarshi Nath, Ehsan Pesaranhajiabbas, Aarsha Surendren, Akhilesh Kumar Pal, Arturo Rodriguez-Urbe, Manjusri Misra and Amar K. Mohanty

A novel magnetically separable pH sensitive surface-active iron oxide nanoparticles for the removal of antibiotics (tetracycline) from aquatic environments 5373
Charles Wroblewski, Sivaranjani Palanisamy Ravikumar, Rahul Islam Barbhuiya, Gopu Raveendran Nair, Abdallah Elsayed and Ashutosh Singh

Hybridizing ZnCo₂O₄-decorated MWCNTs: Electrode to symmetric solid-state supercapacitor configuration 5386
Shrikant S. Raut, T. Kedara Shivasharma, Suraj R. Sankapal and Babasaheb R. Sankapal

Ga-doped CeO₂ solid solutions as promoters for Cu-based catalysts: Enhancing CO₂ hydrogenation to methanol via optimized metal-support interaction 5398
Tuo Guo, Wenwen Liu, Panpan Yang, Qingjie Guo and Pei Sean Goh

Modelling the effect of water and zinc acetate concentrations on the size and morphology of ZnO nanoparticles obtained via the precipitation method 5410
Oscar J. Suarez and Helia B. León-Molina

Optimization and prediction of chromium (iv) removal from synthetic acid mine drainage using green adsorbents: A Box–Behnken design and adaptive neuro-fuzzy inference approach 5422
Linda L. Sibali and Banza M. Jean Claude

Ultrasonication process-induced highly dispersed SiO₂ on ZnO nanoparticles for improving catalyst dispersibility and photocatalyst performances 5435
Lailatul Qomariyah, Tomoyuki Hirano, Nicky Rahmana Putra, Abdul Kadir and Hendrix Abdul Ajiz

Preparation of high transmission superhydrophobic SiO₂ thin films and simulation of solar cell efficiency 5448
Juan Xu, Lili Hu, Lu Gan, Cui Huang and Yongsheng Liu

Process Control, Systems Engineering, and Statistics

SF-PFE: A slow feature extraction method based on the fusion of fast and slow pathways for parallel linear and nonlinear process monitoring 5456
Andong Zhu, Ying Tian, Zhong Yin and Xiuhui Huang

Induction motor process monitoring in power plants based on multi-step reconstruction-based PCA 5477
Ran Cui, Shaojun Ren, Qihang Weng and Fengqi Si

Multi-mode process fault diagnosis method integrating GMM with reconstruction-based PCA 5492
Jizhen An, Qihang Weng, Shaojun Ren and Fengqi Si

Optimal control for the metabolic activity of microbial cells through the metabolic flux parameterization 5508
Quan Li, Liqiang Jin, Chenxi Tao, Zhonggai Zhao and Fei Liu

Reaction Engineering, Chemical Kinetics, and Catalysis

Corn cob pyrolysis: A systematic literature review of methods and applications 5520
Vilmar Steffen, Maiquiel Schmidt de Oliveira, Lais da Silva Pego Hericks, Schaline Winck Alberti, Marlon Henrique da Silva and Edson Antonio da Silva

The catalytic Baeyer–Villiger oxidation of cyclohexanone to ε-caprolactone over cerium–tin oxide 5586
Ruolin Wang, Guanwen Chen, Miao Chen and Zhanke Wang

Studying complex formation of zirconium in N,N dimethylformamide (DMF) [ZrO(OH)₂.(DMF)] using DFT calculations to produce dimethyl carbonate via transesterification 5597
Surbhi Dahiya, Pankaj Kumar, Vimal Chandra Srivastava and Vimal Kumar

SrO-modified Pd/Al₂O₃ three-way catalyst with advanced activity for passive selective catalytic reduction operation 5611
Yanmei Kong, Wenjing He, Longlong Zhang, Meihua Zhu, Shuanghua Cheng, Huasheng Lin, Li Lan, Shanhu Chen, Chuanjie Cheng and Liang Shen

Highly selective monosubstitution of symmetrical dialkoxysilanes in continuous flow: Kinetics and mechanisms research 5623
Jiadi Zhou, Shangkun Bai, Weilong Zhang, Bingbing Chen, Yuyu Yang, Qilin Xu and Zhiqun Yu

Separation Processes

Selective leaching and recovery of lithium ions from lithium slag with low lithium content 5635
Yun Li, Liping Dong, Pei Shi, Yida Li, Hao Yang, Nianke Zheng, Zhongqi Ren and Zhiyong Zhou

Leaching kinetics of metallic silver with sodium cyanide in hydrogen peroxide solution 5648
Salih Aydogan, Mohamed Taha Osman Abdelraheem, Babiker Ali and Mustafa Boyrazli

Preparation and selective adsorption performance of F-modified ZSM-5 zeolite for m-cresol and p-cresol 5657
Xudong Wang, Yanyang Wu, Tianyou Wang, Bin Wu, Kui Chen and Lijun Ji

A hydrometallurgical process for the separation of lead and bismuth from lead bismuthite 5669
Artem Daminov, Yurii Yukhin, Olga Logutenko and Olesya Sheina

Transport Phenomena, Fluid Dynamics, and Thermodynamics

The effect of discontinuous injection on particle backflow in pneumatic conveying systems 5680
Otome Obukohwo, Andrew Sowinski, Poupak Mehrani and Holger Grosshans

Microscopic regulation and displacement mechanism of polymer–microsphere plug combination for enhanced oil recovery in sandstone reservoirs 5690
Yongtao Ju, Hongmei Luo, Xuena Zhang and Jie Zhang

Parametric investigation of drying processes for graphene nanomaterials: Heat and mass transfer analysis 5704
Naima Benmakhlouf
