

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

MAY 2026

VOLUME 104 NUMBER 5

Issue Highlights 2203

Editorial

CJCE 2025 Editor's Choices 2204
João B. P. Soares

Experimental Methods in Chemical Engineering Special Series

Experimental methods in chemical engineering: Atomic absorption spectrometry—AAS 2206
Emily Cintia Tossi de A. Costa, Jildimara de Jesus Santana, Viviane de Oliveira Campos, Felipe Fernandes Barbosa and Gregory S. Patience

Article

Environment, Renewable Resources, Green Processes

Hydrometallurgical strategies for the selective recovery of valuable metals from electric arc furnace dust (EAFD): A critical review 2225
Antonio Claret Pereira, Rafael Bruno da Cunha Fonseca and José Rubens dos Santos

Green synthesis of nano-crystallite CuO from waste sources for the enhancement of antimicrobial properties 2242
Md. Sahadat Hossain, Mohammad Raihan Uddin, Sumaya Tabassum, Sanjida Khan, Md. Najem Uddin and Samina Ahmed

Environmental impact assessment of water hyacinth pyrolysis to produce bio-oil 2256
Rita Dwi Ratnani, Nuha Nuha, Soen Steven, Arif Dwi Santoso, Ira N. Djarot, Miranti D. Pertiwi, Joko Triastono, Aldicky F. Amri, Hermawati Cahyaningrum, Rahmania Admirasari, Hadiyanto Hadiyanto, Intan C. Sophiana and Forita Dyah Arianti

Industrial Applications of Chemical Engineering Principles

Optimal susceptor rotation speed in hot-wall horizontal SiC epitaxy using computational fluid dynamics 2269
Huong Mai Thi Kieu, Son Ich Ngo, Young-II Lim and Bum Ho Choi

Experimental study on liquid spreading characteristics in a trickle bed 2283
Wenqian Tang, Hailong Liu, Ruirui Bie, Jiantao Li, Lei Zhang, Nailiang Wang, Zheng Hong Luo and Chunxi Lu

Synergistic enhancement of methane hydrate inhibition using biopolymers: Experimental and computational insights on kinetics and performance 2293
Mihoubi Bahaeddine, Muzhi Guo, Baojiang Sun and Litao Chen

New Materials, Nanomaterials, and Nanotechnology Engineering

A comprehensive review on lignin extraction from lignocellulosic biomass, and nano-lignin synthesis and modification for potential applications 2310
Dinesh Verma, Mithilesh Kumar Jha and Sachin Kumar

Additive manufacturing of smart 3D-printed radiation shielding materials—An innovation in recent times 2333
Kajal Yadav and Sarika Verma

Unveiling the evolution of microstructural and optoelectronic properties of spray-pyrolyzed ZnO thin films via tailoring the aerosol deposition time 2352
Chandrashekhar M. Mahajan and Sarang P. Gumfekar

CrN nanoparticles confined into nitrogen-doped hierarchical porous carbon matrix for efficient electrocatalytic nitrogen fixation 2365
Jing Wang, Ziyi Huang, Jing Chen, Lin Ma, Hui Liufu, Yanjie Xi, Yuyan Zheng, Ruishan Sun and Liying Zhang

Process Control, Systems Engineering, and Statistics

Computational intelligence for empirical modelling and optimization of methylene blue adsorption phenomena utilizing an activated carbon-supported $[\text{Co}(\text{NH}_3)_6]\text{Cl}_3$ complex 2377
Kamel Landolsi, Fraj Echouchene, Ines Chouaieb, Mona A. Alamri, Abdullah Bajahzar and Hafedh Belmabrouk

Predicting solar cell efficiencies using historical data from a manufacturing process 2401
Sushmita Mitra and Vinay Prasad

A resilience evaluation method for multi-hazard domino-effect accidents in chemical industry parks considering safety barriers 2416
Tingyu Gao and Guohua Chen

Root cause diagnosis with co-integration constrained Liang–Kleeman information flow in non-stationary processes 2430
Yuting Li, Xu Yang, Jian Huang, Jingjing Gao and Qing Li

A density-based collaboration preserving projection for fault detection 2445
Xiangyu Meng, Jianchang Liu, Qingxiu Guo, Yuanchao Liu and Wei Zhang

A multi-feature space constrained stacked autoencoder and its application for uncertain process monitoring 2460
Jiandong Yang, Chenhao Wang, Jianbo Yu and Xuefeng Yan

LSTM-iRealNVP: Enhanced industrial process monitoring via improved RealNVP flow models and fault-free samples 2476
Qi Shi, Jia Ren, Guotao Xie and Yan Chen

Collaborative optimization of dynamic early warning and control in desulphurization process via integration of causal inference and temporal features 2496
He Li, Bozhi Yang and Xinyu Gu

Bidirectional sparse principal component analysis for process monitoring 2515
Jinziyuan Lv, Jing Wang, Zhijiang Lou, Xin Jin, Shan Lu and Yungang Lan

Reaction Engineering, Chemical Kinetics, and Catalysis

Thermal and catalytic liquefaction of high ash Indian coals: Kinetics, mechanism, and product characterization 2531
Govind Dubey, Prabu Vairakannu and Pankaj Tiwari

Pilot-scale experimental study on arc-coupled microwave plasma-enhanced pulverized coal ignition 2549
Peng Zou, Naiyuan Xue, Wei Zhou, Junfeng Li, Jingyu Li, Xiaoxiao Meng, Jihui Gao and Guangbo Zhao

Liquid-phase hydrogenation of Chinese white wax to advanced mixed alkanols over Ni-Cu@MgAlO catalyst 2562
Lizhi Chen, Chong Chen, Wenkai Chen, Yiwen Xiao, Gui Chen, Jizu Chen, Hou Mi, Meichun Wu and Yuanxiang Li

Separation Processes

Editor's Choice

A comprehensive review on the extraction and recovery of lithium from primary and secondary sources: Advances toward battery-grade materials 2573
Soner Top, Sait Kursunoglu and Mahmut Altiner

Wettability's influence on MOF membranes for oil/water separation: A review 2597
Erfan Nouri, Alireza Kardan, Fereshteh Raouf and Hossein Alizadeh

Treatment of textile dye effluents using a new polyacrylonitrile nanofiltration membrane developed by UV photo grafting 2621
Fatemeh Seifodin, Ahmad Akbari and Zeinab Khani-Arani

Removal of diclofenac from contaminated water using polypyrrole: A comprehensive adsorption study 2635
Paula Valéria Viotti Moreira, Wardleison Martins Moreira, Débora Federici dos Santos, Sirlei Marques Paschoal and Marcelo Fernandes Vieira

Evaluation of the efficacy of membrane bioreactor in removing hexavalent chromium 2652
Mehdi Asadollahzadeh, Rezvan Torkaman and Meisam Torab-Mostaedi

Transport Phenomena, Fluid Dynamics, and Thermodynamics

The influence of inlet structural parameter on the particles residence time distribution and mixing performance in a gas solid counter flow contact cyclone reactor for MTP 2664
Jie Cheng, Mingyang Zhang, Yannan Sun, Haozhe Guo, Yuhua Fu, Wenjie Zhu and Yaojun Guo

Heat transfer in fully developed Couette–Poiseuille flow of power-law fluids with viscous dissipation 2684
Mohamed Shaimi, Rabha Khatyr and Jaafar Khalid Naciri

Study on main controlling factors of tight gas reservoir productivity 2702
Chao Cai, Zicheng Yang, Jing Wen, Pengfei Luo, Daguang Xu and Jingyi Zhou

Numerical research of flow performance and structure optimization of the U-tooth impeller 2712
Wei Zhang, Haotian Sha, Chen Chen and Yang Li

Fusion dynamics properties of gas-non-Newtonian two-phase flow in microchannels with different branching angles 2728
Bao-he Zhao, Kai Feng and Hui-chen Zhang

Investigate effect of the pitch and helical fins height on the hydrothermal performance of the double-pipe heat exchanger 2745
Basim Freegah, Ammar A. Hussain Al-Tae, Dharmyaa Saad Khudhur and Zahraa. Khudhair

Chemical flooding in low-grade reservoirs of Daqing Oilfield: Newly developed chemical systems and successful practices 2765
Yanyong Wang, Jianguang Wei, Dong Zhang, Lianbin Zhong, Yujing Ding, Bo Li and Rui Zhou
