

# THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

JULY 2026

VOLUME 104 NUMBER 7

- Issue Highlights** . . . . . 3363
- Perspectives in Chemical Engineering Special Series**
- Smiling warnings and silent complicity: An autoethnographic reflection on academic bullying and mobbing . . . . . 3364  
*Daniele Marchisio*
- Article**
- Biotechnology, Biochemical, and Biomedical Engineering**
- Reparameterization of the Monod equation for optimum experimental design and enhanced estimation of model parameters: Application to the nitrification kinetics. . . . . 3369  
*Claudia Santiviago, Nahuel Maidana, Elena Castelló and José Carlos Pinto*
- Mathematical modelling and simulation of hemodynamic alterations in atherosclerotic arteries . . . . . 3390  
*Shazmani Sheikh, Anju Saini and Deepika Saini*
- Environment, Renewable Resources, Green Processes**
- Treatment of commercial industrial wastewater using electrocoagulation: Understanding effect of operating conditions . . . . . 3402  
*Jyoti S. Sangle and Parag R. Gogate*
- Continuous operation of membrane distillation powered by solar vapour absorption refrigeration system using thermal storage tank. . . . 3418  
*Emad Ali*
- Construction of Ag-NH<sub>2</sub>-UiO-66 composites with boosted photocatalytic activity for the removal of contaminants . . . . . 3444  
*Yuanyuan Hu, Yan Tan, Huangqing Liao, Shiyang Long, Jie Huang, Hui Zhang, Gui Chen and Bailin Xiang*
- Industrial Applications of Chemical Engineering Principles**
- Engineering thermochemical reactors using residence time distribution (RTD): Methods, models, and modern approaches . . . . . 3456  
*Arash Javanmard, Fathiah Mohamed Zuki, Wan Mohd Ashri Wan Daud and Muhamad Fazly Abdul Patah*
- Optimization of a reactor for biostimulant production with emphasis on the economic aspects of hydrolysis . . . . . 3484  
*Karel Kolomazník, Lubomír Šánek, Petr Dostálek and Clara Desroches*
- Machine learning framework for sulphur content prediction in crude oil using physicochemical properties . . . . . 3495  
*Suhailam Pullanikkattil and Chandra Shekar Besta*
- Optimization of synthesis parameters for petroleum sulphonate and evaluation of oil displacement performance . . . . . 3512  
*Quande Wang, Cheng Zhao, Xiaodong Wang, Qi Feng, Shengming Huang, Huayan Mu, Tengfei Dong and Guancheng Jiang*
- Model predictive control of coal-fired power plant desulphurization system based on GJO-TCN-BiGRU-attention . . . . . 3527  
*Minan Tang, Zhongcheng Bai, Jiandong Qiu, Chuntao Rao, Yude Jiang and Wenxin Sheng*
- A comprehensive review of gas-based enhanced oil recovery (gas-based EOR) techniques: Mechanisms, applications, and future trends . . . . . 3546  
*Yasin Khalili, Saeed Abbasi and Mohammadreza Bagheri*
- Interpretable symbolic machine learning and optimization framework for reducing arcing time in energy-intensive steelmaking . . . . . 3574  
*Somashish Saha, Narottam Behera and Sandip Kumar Lahiri*
- New Materials, Nanomaterials, and Nanotechnology Engineering**
- Synthesizing polyethersulphone membranes with hybrid iron/nickel nanoparticles for dyes removal: An efficient biogenesis approach. . . . . 3593  
*Qusay A. Almajras, Ahmed K. Hassan, Dahiru Lawal, Mohammed Awad, Raed A. Al-Juboori, Muhammad Irfan, Muhammad Rafiq and Qusay F. Alsahly*
- Computational intelligence approaches for hydrogen storage material design . . . . . 3618  
*Abdulhalim Musa Abubakar and Mahlon Kida Marvin*
- Micro-explosions caused by the reaction of nano-sized aluminium and polyvinylidene fluoride to promote the micron-sized aluminium combustion and inhibit its agglomeration . . . . . 3644  
*Jiahui Wu, Tianyu Yang, Lingqi Zhu, Yunlan Sun and Baozhong Zhu*
- Process Control, Systems Engineering, and Statistics**
- Optimizing profitability of batch fermentation processes using machine learning-based endpoint prediction . . . . . 3660  
*Hechang Shi, Cheng Ji, Jingde Wang, Wei Sun and Chi Zhai*
- Probabilistic dynamic stationary subspace regression model for soft sensing of nonstationary industrial processes . . . . . 3677  
*Jingyun Xu, Hongxia Zhao, Chenghui Mo, Kexin Fang and Bin Yu*
- Reaction Engineering, Chemical Kinetics, and Catalysis**
- Modelling of continuous low-temperature emulsion co-polymerization in 3D-printed reactor . . . . . 3692  
*Ferel Issa, Andreas Reinbeck and Kristina M. Zentel*
- Effect of inlet structure parameters of dispersed phase on flow field characteristics in a liquid-liquid cyclone reactor . . . . . 3714  
*Yaojun Guo, Mingyang Zhang, Haitong Tian, Yuanjing Liu, Chenxing Jiang, Wenjie Zhu, Jie Cheng and Wenjie Zhan*

Dyes decolourization and detoxification of methylene blue and methyl orange by TiO<sub>2</sub>/nylon photocatalytic systems . . . . . 3729  
*Daiane Marques de Oliveira, Ana Caroline Raimundini Aranha, Jean César Marinozi Vicentini, Mara Heloisa Neves Olsen Scaliante and Marcos de Souza*

**Separation Processes**  
**Editor's Choice**

Microplastics and nanoplastics in water: Improving removal in wastewater treatment plants with alternative coagulants . . . . . 3744  
*Sinan Abi Farraj, Mathieu Lapointe, Rafael S. Kurusu and Nathalie Tufenkji*

Characterization of a two-phase hybrid flotation column . . . . . 3758  
*Pedro Silva Aires, Artin Afacan, Qi Liu and Vinay Prasad*

Optimal model-based design of experiments for parameter precision: Supercritical extraction case . . . . . 3775  
*Oliwier Sliczniuk and Pekka Oinas*

Research status and future prospects of numerical simulation in mineral flotation . . . . . 3796  
*Bo Huang and Huilin Liu*

Ultrasound-assisted extraction and purification of bromelain from pineapple (*Ananas comosus*) stem waste using ethanol precipitation and resin adsorption . . . . . 3827  
*Michelle Maria Detoni Zanette, Ana Caroline Raimundini Aranha, Sirlei Marques Paschoal, Wardleison Martins Moreira, Murielk Sebrian Valvassore, Edson Antônio da Silva and Marcelino Luiz Gimenes*

Anti-solvent crystallization for the preparation of drug nanocrystals via amphiphilic copolymer (AcMH-b-PEG) micelles as soft templates . . . . . 3840  
*Yini Wang, Boxuan Lou, Yue Xu, Haikuan Yuan and Jie Lu*

Efficient stripping of scandium from D2EHPA-based systems using polyhydric alcohols . . . . . 3858  
*Isaac Fleitlikh, Natalya Grigorieva, Alexey Tikhonov, Vyacheslav Krasnov, Elena Karpova and Olga Logutenko*

Computational optimization of flotation time in Cu–Pb sulphide processing: A multi-algorithm analysis of kinetic models . . . . . 3867  
*Ahmed Abbaker, Yakup Cebeci, Turan Kiliç, Selma Şimşek, Mustafa Şeker, Mahmoud Motasim and Uğur Ölgen*

CFD modelling and qualitative assessment of liquid entrainment in flare systems . . . . . 3892  
*Sudalai Manikandan Esakki, Bhuvaneswari Govindan, Ramesh Ramakrishnan, Hariharadharraja Vengateswaran and Cline Claudio*

**Transport Phenomena, Fluid Dynamics, and Thermodynamics**

Fractional MHD flow of Jeffrey nanofluids with nonlinear thermal radiation and activation energy . . . . . 3903  
*Dhandapani Prabu and Sengottaiyan Sridhar*

Numerical simulation study of mixing efficiency in a T-tube mixer and analysis of its competitive mechanism with yield . . . . . 3926  
*Dong Ji, Shuangfei Zhao, Tao Huang, Siyuan Chang, Junsong Song, Bingfeng Li, Yuguang Li, Lei Shen and Xuejun He*

Determining the Bingham yield stress and viscosity of fly-ash slurries using mini-cone slump tests: A numerical study . . . . . 3939  
*Lianfu Zhang, Zhikai Wang, Ke Yang, Hongjiang Wang, Lei Tang, Chenyuan Gao and Yongqiang Hou*

Numerical studies on PCM's contribution for thermal energy storage in continuous operation . . . . . 3952  
*Shyam Kumar Rajak, Akash Raj and Debasree Ghosh*
