

THE CANADIAN JOURNAL OF CHEMICAL ENGINEERING

AUGUST 2026

VOLUME 104 NUMBER 8

Issue Highlights 3967

Editorial

Perspectives and conversations in chemical engineering 3968
João B. P. Soares

Article

Environment, Renewable Resources, Green Processes

Effect of different flue gas recirculation rates on low-NO_x combustion characteristics: A numerical simulation based on the combustion process of a gas boiler 3970
Chao Min, Shuhao Xu, Yitao Yang and Peng Wang

Valorization of Yacon (*Smallanthus sonchifolius*) peel for peroxidase production and its immobilization on alginate beads for 2,4-dichlorophenol bioconversion 3984
Mariana Gomes Oliveira, Marcela Pires Spaolonzi, Carla Ivane Ganz Vogel, Aniela Pinto Kempka and Everton Skoronski

Unravelling the initiator-only stage in alginate grafting: Radical-induced depolymerization and its impact on acrylamide grafting efficiency 3996
Gustavo P. Zago and João B. P. Soares

Comparison and analysis of pyrolysis characteristics and kinetics of alfalfa and timothy based on TG-DTG-DSC 4007
Lu Sun, Kaili Xu, Jishuo Li, Tengting Hao and Zhenhua Liu

Eco-friendly dye removal: Optimized synthesis of a magnetic Schiff base biocomposite from peanut shell chitosan for enhanced Reactive Blue 19 adsorption 4023
Alia Khaoula, Atia Djamal, Hafidha Terea, Salah Eddine Laouini, Abderrhmane Bouafia, Mahmood M. S. Abdullah and Tomasz Trzpieciński

Influence of chitosan quaternary ammonium salts on the kinetics of methane hydrate formation in multi-complex system 4041
Ziyang Zhu, Dan Hao and Qinli Lu

Thermal behaviour and product evolution during co-pyrolysis of rice husk and waste tire 4054
Jishuo Li, Xiwen Yao, Kaili Xu and Xingyu Luo

Synthesis SBA-15 from fumed silica and their removal performance for rhodamine B 4067
Shunmin Yi, Xiurong Chen and Caiyun Han

Industrial Applications of Chemical Engineering Principles

Editor's Choice

Data-driven simulation of crude distillation using Aspen HYSYS and comparative machine learning models 4079
Aldimiro Paixão Domingos, Heleno Bispo, Thiago Vaz da Costa and Sérgio Mauro da Silva Neiro

Synthesis and characterization of a highly hydrophilic nanocomposite for wettability alteration, water/oil interfacial tension reduction, and enhanced oil recovery 4101
Ehsan Jafarbeigi, Ehsan Kamari and Amir H. Mohammadi

Transient thermal modelling of green anode cooling in the aluminium industry 4120
Mohammadhossein Dabaghi, Duygu Kocaefe and Yasar Kocaefe

Spatially resolved ²³Na magnetic resonance dispersion measurement in porous media 4135
Rheya Rajeev, Mohammad Sadeq Zamiri, Andrés Ramírez Aguilera, Florea Marica, Laura Romero de Zerón and Bruce J. Balcom

Acid-based chemical slugs for enhanced oil recovery: Interfacial tension reduction, wettability alteration, and emulsion stabilization 4151
Pasivedala Raj Kumar, Lavisha Jangid and Ajay Mandal

Mass transfer resistances in mesoporous silica-alginate/chitosan encapsulated *Saccharomyces cerevisiae* for bioethanol production 4168
Abdulmumin Bilyamin, Habiba Ilyasu Atta, Abdulazeez Yusuf Atta and Jibril Baba El-Yakubu

Spray characteristics of a compound rotary pressure atomization nozzle 4183
Liting Li, Mingjun Xu, Shangzhi Yu, Ying Duan, Qinglong Xie, Xiaojiang Liang, Zhenyu Wu, Xiaoning Mao and Yong Nie

Investigation of the effects of CeO₂ addition to MCM-41 supported CrO_x catalysts on catalytic performance in isobutane dehydrogenation 4199
Meltem Dogan and Saliha Cetinyokus

Design principle based on intrinsically safe burner for entrained flow gasification and industrial application 4213
Jianliang Xu, Guangrun Yang, Xiaoyang Xie, Hui Zhao, Qinfeng Liang, Xiaolei Guo, Zhenghua Dai and Haifeng Liu

Development and performance characterization analysis of high-efficiency liquid-phase dechlorination agent for catalytic reformat 4227
Fan Yulei, Chen Lantian, Du Wenqiang and Xu Yarong

Polymer-surfactant synergy for high-turbulence drag reduction in hydrocarbon media: Experimental and reduced-order modelling approaches 4237
Wafaa K. Mahmood, Samar S. Hussein, Duaa A. Ali, Hayder N. Hussein, Eman E. Arif and Andy M. Abd Al-Aziz

New Materials, Nanomaterials, and Nanotechnology Engineering

Innovative electrospun geopolymer/zeolite/PVA composite membranes 4254
Mariana Schneider, Mar Calzado-Delgado, Enrique Rodríguez-Castellón, Maria Olga Guerrero-Pérez, Dachamir Hotza, Agenor De Noni Junior, Adel Zrelli and Regina de Fátima Peralta Muniz Moreira

High catalytic performance of crystalline facet-engineered nanostructure γ -Al₂O₃ supported Ni catalyst for optimizing benzene hydrogenation 4267
Abhishek Siuli and Shyamal Roy

Integration of advanced materials based on Zn/Cu oxides nanoparticles on sawdust and recycled EPS to enhance wood agglomerates with improved mechanical, physical, and antifungal properties. 4291
Delia Monserrat Ávila-Marquez, Alien Blanco-Flores, Sergio Alfredo Riveros Alvarez, Helen Paola Toledo-Jaldin, Maribel González-Torres, Sergio Gutiérrez-Cortez, Alfredo Rafael Vilchis-Néstor, Alfredo Olarte-Paredes, Areli Marlen Salgado Delgado and Jaime Eduardo Sánchez Guzmán

Process Control, Systems Engineering, and Statistics

A-optimal model-based design of experiments for processes with uncertain inputs 4307
Bright Ofori, Iman Moshiritabrizi, Anh-Duong Vo and Kimberley B. McAuley

A hidden Markov model and reinforcement learning-based strategy for fault-tolerant control 4322
Tamera Leitao, Debaprasad Dutta and Simant R. Upreti

An efficient stability criterion for process control systems based on numerical computation of matrix square root with predefined accuracy 4337
Hooman Fatoorehchi, Rooholah Abedian, Matthias Ehrhardt and Philip Loldrup Fosbøl

Improved dynamic matrix control using co-optimization of dynamic control and economic performance enhancement 4353
Yixin Chen, Chonggao Hu, Jianjun Bai and Hongbo Zou

Real-time supersaturation monitoring in cooling crystallization via hybrid electrical conductivity-ultrasonic sensor fusion 4368
Junjie Li, Zhengbin Pan, Yiting Xiao, Xinyu Wang and Bo Kong

Robust control of fermentation temperature-humidity under process disturbance and uncertainty 4383
Trong Hieu Do and Van Dong Nguyen

Reaction Engineering, Chemical Kinetics, and Catalysis

Beyond hydrogen: Process design of a biogas steam reformer for Fischer-Tropsch synthesis 4394
Rafael Belo Duarte, Rafael Dei Tós Barreto, João Lourenço Castagnari Willimann Pimenta and Luiz Mario de Matos Jorge

Oxidative dehydrogenation-esterification of iso-butyric acid over hydrothermally synthesized iron phosphate-silica catalyst 4407
Vishal D. Khomane, Nibedita Sanyal and Virendra K. Rathod

Separation Processes

Precipitation of niobic acid from potassium niobate in sulphuric acid solution: A route to niobium oxide 4419
Cássia R. Souza, Gabriela C. Silva, Isabel P. Silva, Frederico M. Penha and Sônia D. F. Rocha

Treatment of waste plastic recycling facility wastewater via pre-coagulated electrooxidation process 4435
Oğuz Şahiner, Orhan Taner Can and Murat Solak

Composite membranes comprising of polymeric and molecular amines embedded in poly(vinyl alcohol) matrices to facilitate CO₂/H₂ separation 4453
Steve Yijie Hu, Kean Wang and Xianshe Feng

Sustainable PAN/PLA blend membranes with green nanoparticles for efficient oil-water separation 4464
Raad H. Khudher, Ahmad A. Hasan, Talib M. Albayati, Eman H. Khader, Noori M. Cata Saady and Sohrab Zendejboudi

The motion and separation mechanism of droplets in the cyclone reactor for ionic liquid alkylation. 4492
Jinghe Bi, Xinhao Li, Fajian Li, Xiaogang Xu, Jiaxiang Lai, Liyun Zhu and Zhenbo Wang

Transport Phenomena, Fluid Dynamics, and Thermodynamics

Pore structure and polymer flooding characteristics in the Sa'n'an Development Zone of Daqing oilfield 4506
Yaoguo Feng

Numerical simulation of flow field in sodium electrolyzer 4521
Ergeer Tu, Xiaoqiang Jia and Guimin Lu

Experimental study on the effect of superheated steam on steam huff and puff enhanced oil recovery in heavy oil reservoirs in Liaohe Oilfield 4534
Bing Liu

Numerical simulation of gas-liquid two-phase flow and electric heating field in lithium electrolytic cell 4552
Hao Chen, Shigui Zhu and Guimin Lu
